Beatty

David

Blue Ridge VFRC Rep

7/21/2020

8/31/2021

12/17/2019

The Commission shall consist of eight (8) members including:

-1 member of the Board of Supervisors; The Clarke County Sheri; 1 representative from each of the volunteer fire and EMS companies; 3 citizens-at-large representing consumers of fire and EMS services. The 3 volunteer fire and EMS company representatives shall serve one-year terms and shall be appointed by the Board of Supervisors with recommendation to be provided by the volunteer companies. The 3 citizens-at-large shall be appointed for 4 year terms. The Sheriff shall serve a term coterminous with the term of office.

The Board of Supervisors shall appoint a representative annually at or shortly after its annual organizational meeting to serve a one-year term

December 2021

Barns of Rose Hill Board of Directors

3 Yr

Cook Peter

4/20/2021

12/31/2021

4/20/2021

A Board Member is elected for a three-year term and may serve a maximum of two terms. One member of the Board will be named by the Town Council of Berryville and will serve as liaison to the Town. One member will be named by the Clarke County Board of Supervisors and will serve as liaison to the County. The two liaisons will be considered regular Board Members, with the same rights and responsibilities as other Board Members. A director may be elected for up to two consecutive three-year terms, after which a year must be spent off the Board before consideration for Board reappointment. A director's term shall begin January 1.

# **COUNTY CODE TEXT AMENDMENT (CC-2021-07) Chapter 143 – Septic System Ordinance**

#### STAFF REPORT – Department of Planning

\_\_\_\_\_

The purpose of this staff report is to provide information to the Board of Supervisors to assist them in reviewing this proposed text amendment to the Code of Clarke County. It may be useful to members of the general public interested in this proposed amendment.

-----

#### **Description:**

Proposed text amendment to amend Chapter 143, Septic Systems, of the Code of Clarke County. The purpose of the amendment is to update requirements based on changes to onsite system technology and issues identified by staff and Health Department personnel. The last major update to the Ordinance was in 2010 in response to changes in State Code requiring localities to permit Alternative Septic Systems. Major changes include requiring 100% inspections of all new systems and component replacement of existing systems; deleting unused or unenforceable sections such as temporary pump and haul and privies.

#### **Code of Virginia Authority:**

- § 15.2-1200. General powers of counties
- § 15.2-2157. Septic tanks and sewage disposal when sewers not available
- § 32.1-163 et seq. Sewage disposal

#### **Requested Action:**

Conduct scheduled Public Hearing and take formal action on the proposed text amendment. Staff has no outstanding concerns with the adoption of this text amendment.

Background: Onsite sewage treatment systems are the primary means of sewage disposal in Clarke County. Clarke County adopted the current septic ordinance in 1987 as a result of extensive study into ways to protect our groundwater resources, particularly in karst areas. At that time, it was noted that State septic regulations apply statewide regardless of geology and soil types. Virginia has multiple types of bedrock, from the limestones in the Shenandoah Valley, to the sedimentary layers on the Coastal Plain, with igneous/metamorphic zones in-between. These geologic formations and subsequent soil types have unique properties that treat septage very differently. It was determined that the Commonwealth's one size fits all approach may not protect groundwater resources as effectively as regulations customized for the specific soil types encountered in Clarke, particularly in karst.

There are 2 types of septic systems, conventional and alternative. Conventional systems are typically gravity fed with a septic tank, distribution box, and drainfield. Wastewater flows from the house to the tank where solids are collected, the liquid flows through the distribution box that distributes waste to the drainfield. The primary treatment occurs in the septic tank and final treatment is the drainfield area. Microorganisms in the soil treat the effluent (remove bacteria) as the liquid flows through the soils in the drainfield prior to entering the groundwater.

Alternative systems are more complicated as they are engineered systems. They consist of pretreatment units, pumps and filters that clean the effluent prior to discharge into the drainfield.

The pre-treatment allows for a smaller drainfield footprint as less soil area is need for treatment. As a result they are installed in areas that would not support a conventional system. Due to the complexity of these systems they required, by state law, to have annual monitoring to ensure they function as designed. Problems arise when they are not maintained and the systems discharge untreated or poorly treated effluent into an undersized drainfield. Staff has determined that there is little to no oversight by the Health Department to verify that required inspections are being conducted, as the law states that it is the homeowners responsibility to establish a contract with a licensed operator. VDH staff intends to develop a database to track maintenance of these systems.

In general the County ordinance addresses septic system installation as opposed to maintenance. The County ordinance is stricter than the state regulations with regards to setback distances from sinkholes, rock outcrops, ground and surface waters. The purpose of the increased distances is to provide more buffer between the contamination source - septic systems - and groundwater. Increased buffer equates to increased potential for septage treatment prior to impacting water. Additional items not in the state regulations but currently included in the County's ordinance are resistivity testing to ensure there are no voids under new drainfields, an existing system policy that defines when an existing drainfield can be used for a new house, addition or business, allowing for offsite septic systems for commercial property or homes built before 1987 if no site can be found on the existing parcel, and a variance process that establishes criteria for when a variance can be applied for such that vacant lands are not eligible.

#### **Staff Discussion/Analysis:**

This text amendment is proposed by Staff in order to update the County's septic systems ordinance based on changes to onsite system technology and issues identified by staff and Health Department personnel in implementing the current ordinance.

The ordinance has been amended to help clarify the intent and staff incorporated sections of the Loudoun County Septic Ordinance section 1066. The Loudoun Ordinance was selected as it was recently updated in 2016 and includes sections pertaining to karst and non-karst soils, similar to Clarke's approach. Additional changes include modification or deletion of several sections included in the 2010 amendment to improve implementation.

Initial review and input was provided by Environmental Health Supervisor Jim Davis, Clarke County, retired former Senior Environmental Health Specialist Jerry Franklin, Loudoun County, and the County's contract environmental engineer, Robert K. Denton Jr., CPG, LPSS, LRS, Senior Geologist at Terracon. Once a draft was developed, staff met with Health Department staff including Mason Allen, District Environmental Health Manager, Jim Davis, Senior Environmental Health Specialist Clarke County, and Carter Neiswander, Environmental Health Specialist, Clarke County. The draft was reviewed to ensure that the current Health Department staff was comfortable with the proposed changes. A second meeting was held with Onsite Septic Evaluators – all OSE's working in Clarke were invited to attend and provided with the draft ordinance. The meeting was attended by the Health Dept. staff listed above in addition to Evan McCarthy, Piedmont Environmental Council, Frank Lee, Planning Commissioner and OSE, Rob Charnley, OSE, and Ryan Fincham, OSE, former Clarke County Environmental Health

Specialist, and currently employed by the Loudoun County Health Department. Several changes to the draft were agreed to at that meeting.

The attached Conversion Chart details changes to each section of the ordinance.

The most significant change is to focus the efforts of Health Department staff towards ensuring proper installation of all systems by requiring 100% inspection of soils and siting, in addition to inspecting replacement components of existing systems. The regulations need to be changed in order to enable required inspections. This had been done in the past but changes to state regulations reduced required Health Department inspections to 10% and no inspection of replacement components. The state made these changes as part of their effort to privatize septic system siting and installation. Staff equates this to building a house without a building inspection.

In discussions with Health Department staff, they stated that there would be no additional costs for inspections of either new systems or replacement of existing system components. It will be incumbent on the contractor to coordinate the inspections with the local health department and the OSE/PE involved. Mr. Davis stated that he does not anticipate any significant delays in homeowners getting their inspections in a timely manner.

# Major proposed changes include the following. Section numbers are from the proposed draft:

143-1 – Intent. This section was changed from permit for installation to intent as it seems more logical to describe the purpose of the ordinance first. Added reference to VA code section 15.2-1200 General powers of counties that states:

"Any county may adopt such measures as it deems expedient to secure and promote the health, safety and general welfare of its inhabitants which are not inconsistent with the general laws of the Commonwealth. Such power shall include, but shall not be limited to, the adoption of quarantine regulations affecting both persons and animals, the adoption of necessary regulations to prevent the spread of contagious diseases among persons or animals and the adoption of regulations for the prevention of the pollution of water which is dangerous to the health or lives of persons residing in the county."

Mr. Mitchell reviewed this section and recommended the following addition:

"To the extent that any provision of this Chapter 143 conflicts with any other provision of State or local law, the more stringent provision shall apply; provided, however that, to the extent that any provision of Chapter 143 as applied to an alternative onsite sewage systems (AOSS) is deemed to be additional to or more stringent than the requirements and standards for alternative onsite sewage systems of the State Board of Health, then this chapter shall apply to the greatest extent possible and the said State requirements and standards shall apply if (i) sewers or sewerage disposal facilities are not available in the area of the subject property, and (ii) the alternative onsite sewage system used on the subject site has been approved by the State Board of Health for use in the particular circumstances and conditions in which it is to be operating."

143-2 Definitions: added definitions regarding floodplains to be consistent with the Zoning Ordinance; added definitions as related to the resistivity section as edited by Mr. Robert Denton, Geologist with Terracon, the County's geotechnical consultant; updated definitions of alternative

and conventional onsite systems, and others per Loudoun's Ordinance, so that terms in the Loudoun sections are defined, and added the definition of the Spring Conservation Overlay District in order to reference onsite system installation requirements as described in the Zoning Ordinance.

143-3 Approved method of Sewage Disposal required: added from Loudoun County Section 1066.02 to clarify that approved sanitation methods are required. Clarified that Alternative discharging sewage system and mass drainfields are prohibited neither system is frequently used and can be problematic. Discharge systems essentially discharge treated waste onto the ground into a ditch or drainage way, if the system malfunctions untreated waste would be on the ground surface. Mass drainfields are generally used for condominiums, shopping centers, commercial development, and new subdivisions. Large drainfields of this type are difficult to site in Clarke do to soil limitations and most of these facilities are best served by public sewer systems, so allowing these systems is not practical.

143-5 License requirements for Installers. The current ordinance uses outdated terms such as Septic Tank Cleaner's license, that is now referred to as a Sewage handling permit per recommendations by Health Department. In addition, sections were added from Loudoun's Ordinance 1066.04 to clarify that licensing is required.

143-6 Inspections of existing systems – require Health Department inspections of all maintenance requiring replacement of component parts including building sewers, distribution boxes, conveyance lines and header pipes. Added from Loudoun's Ordinance Section 1066.05, with the added requirement for a County only permit (no fee) to ensure 100% Health Department inspections of component replacement. In discussion with Health Department personnel they agreed that inspecting replacements, particularly for distribution boxes can reduce system problems.

143-7 Responsibility of Owner – added from Loudoun's Ordinance 1066.07 to place responsibility for onsite systems on property owners

143-9 – Inspection and approval of design and location – requires Health Department inspection of all systems starting with soils and siting. This is currently not being done and if we want VDH to inspect all systems we need to state this in our Ordinance. This was done in the past but in recent years onsite inspections have been reduced due to state regulations that place time limits on permit approvals. In discussions with Health Department staff, it was determined that soil and siting inspections can be completed prior to the submission of an application so that time limits are not impacted. These are important to ensure that setbacks, particularly to wells, are met and to ensure compliance with soils and siting prior to the system being installed. Currently the Health Department reviews applications submitted by Onsite Soil Evaluators but typically do not do site visits.

Health Department staff supports the practices of inspecting 100 percent of all installations. The goal of the Health Department is to provide an independent standardized review of installations in order to protect groundwater.

Additional changes to this section include deleting requirements for fencing or restricting vehicle access as this is not practical to enforce; also deleted is the requirement of a written indemnity agreement that would release the County from any liabilities relating to a failed system as this was never done and other laws adequately protect County personnel from such liability.

143-10 – Soil evaluation criteria – this section is from Loudoun County Ordinance Section 1066-11 and describes soil evaluation and closure of pits after evaluation, and clarifies responsibilities for soil evaluation. Mr. Franklin, recommended including this to ensure all information is provided regardless of changes to state regulations.

143-11 - Determining soil/sites – this section was added from Loudoun County 1066.11 in order to ensure which items shall be included in an application for septic permit in case state requirements should change. HD staff recommended reducing the minimum depth of the profile hole from six to five feet, because at 6 feet OSHA requires shoring up sidewalls. If additional depth is needed an auger can be used for sampling. In addition, a section pertaining to the Spring Overlay District was added to ensure that increased standards are enforced by the HD.

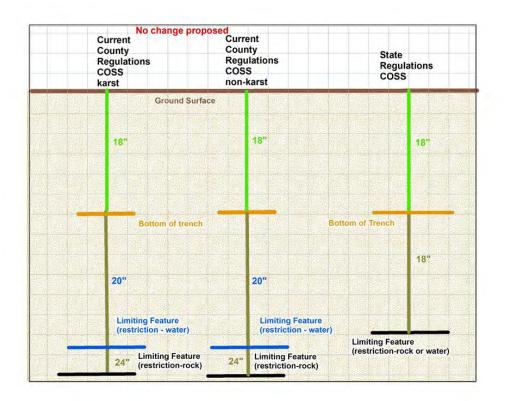

143-12 – System siting – this section pertains to soil restrictions for onsite system installation. Changes include replacing text descriptions to a table for clarity. The current ordinance has install depth requirements for drip systems, these have been revised. This section regulates depth of installation for AOSS drip systems, requiring an installation depth of 10" in karst soils that essentially precludes drip systems. These changes are being made as recommended by the Health Department.

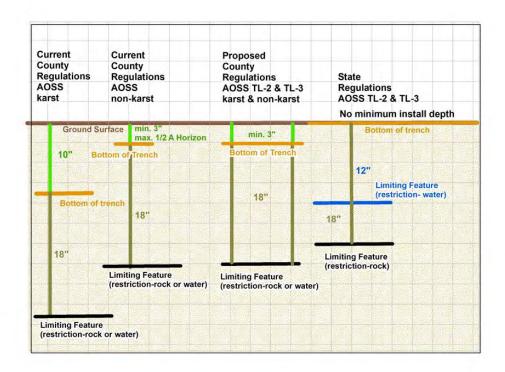

Section 143-9-3 has been amended to delete option for installing systems in wooded areas. The Health Department recommends that all woody vegetation be removed from the drainfield site as roots from trees and shrubs can clog lines rendering the system unusable. Items 4, 5, and 6 are incorporated into the table.

AOSS TL-2 and TL-3 systems have replaced use of low pressure systems. Setbacks based on comments from the Health Department, and are described in new Table 1.

Table 1.

		sidewalls (horizontal)	bottom (vertical)
Distance to rock non-karst (COSS)		24"	24"
Distance to rock – karst (COSS)		24"	24"
AOSS	TL-2	18"	18"
AOSS	TL-3	18"	18"
Distance to seasonal water table (COSS)			20"
AOSS	TL-2		18"
AOSS	TL-3		18"

**There is no increase or change to the setbacks.** The table was suggested to make the setbacks easier to read. The proposed amendments replace use of low pressure systems with AOSS and provides a reduction in standoff to rock with TL-3 treatment. Because Clarke has limited operation and maintenance enforcement, these systems, if not properly operated and maintained, greatly increases the chance of a technology failure impacting ground water.

Attached are two charts that show the difference between Clarke's setbacks and State setbacks. From information collected in Loudoun's mandatory onsite operation and maintenance program, it is known that pretreatment systems commonly do not function as designed. When pretreatment is not adequately functioning, the increased standoff serves as a measure of protection to groundwater. Onsite systems are expected to treat all contaminants that come down the drain, not just fecal coliform. Soil and various methods of pretreatment vary in ability to reduce contaminants. Soil continues to have a role with some contaminants that the pretreatment unit may not be able to treat especially if it is not functioning as designed.

Section 143-12-D – increased the distance permitted from house to drainfield from 400' to 500' because past 500' requires engineering, and 400' is an arbitrary number the purpose being to keep drainfields in close proximity to a house in case it is later subdivided off into a 3 acre lot.

Added new section 143-12-F Driveway setback of 10' per HD suggestion from Loudoun Section 1066.12, this will also include private access easements.

Added new section 143-12-G Size of absorption fields from Loudoun Ord Section1066.12 Currently Clarke does not address absorption field size. VDH recommends a minimum soil absorption (drainfield) be 400 square feet, and an alternative drip surface square footage designed system to have a minimum square footage of 1,200 square feet.

State regulations allow an absorption area for single family residential dwellings to be as small as 50 square feet for a one (1) bedroom dwelling with TL-3 treatment. Requiring slightly larger footprints than state requirements provide a margin of safety from overuse.

143-12-I. This section allows for encroachment into setback areas for replacement, repair and expansion of existing systems. The amendment will eliminate expansions from list that are allowed to encroach no closer than existing site features, as expansions are voluntary and should not be permitted to encroach on required setbacks.

143-12-M. Resistivity testing (subsurface investigations) – added language from Bob Denton such as using preferred technical terms in describing features, such as irregularities should be referred to as anomalies, and further describing qualifications for who can conduct third party review.

Deleted section on privies. The current ordinance requires permits for privies located in the floodplain of the river. Permitting was enforced for a few years but VDH found it extremely time consuming and difficult to enforce. Enforcement of 100% inspections is much better use of limited staff resources.

143-14 Appeals and Variances – changed composition of Board of Septic and Well appeals to allow for more flexibility with Board and Planning Commission members and alternates.

Changed variance criteria from "habitable building" to "existing single family homes" or "existing businesses" as determining if a building is habitable can be problematic.

Deleted temporary pump and haul. This deletion is supported by VDH, stating it is not needed. Pump and haul is adequately regulated in the state Sewage Handling and Disposal Regulations that state temporary pump and haul is for a maximum of one year and can't be extended. Anything more than a year is permanent pump & haul and requires county approval.

## Staff Recommendation:

Staff has no outstanding concerns with the adoption of the text amendment.

#### Chapter 143 Septic Systems – REVISION 10-28-21

**BOLD** font = changes and inserts from Loudoun County Ordinance Ch. 1066

Colored text – comments from reviewers

**PURPLE – Ryan Fincham comments** 

[HISTORY: Adopted by the Board of Supervisors of Clarke County as indicated in article histories. Amendments noted where applicable.]

#### **General References**

Chapter 71 Building Construction Chapter 161 Subdivision Of Land

Chapter 180 Water And Wastewater, Article I Sewage Disposal

Chapter 184 Wells Chapter 188 Zoning

#### **Code of Virginia References**

#### § 15.2-1200 General Powers of Counties

§ 15.2-2157. Septic tanks and sewage disposal when sewers not available

§ 32.1-163 et seq. - Sewage disposal

#### § 143-6-1. Intent; state regulations; exceptions.

The intent of this article is to minimize the potential for groundwater contamination resulting from improper siting and construction of onsite sewage systems in Clarke County. Clarke County has Karst topography and fragile hydrogeology and has the potential for depletion and contamination of water sources and the potential for hazards to public health, safety and welfare as a result. To protect the health, safety and welfare of the general public, the standards as set forth hereafter in this chapter are established for all onsite sewage systems constructed or installed in the County. Pursuant to these goals, the Board of Supervisors hereby exercises its power, as granted by **Sections 15.2-1200** and 15.2-2157 of the Code of Virginia (1950, as amended), to protect groundwater by regulating onsite sewage systems.

To the extent that any provision of this Chapter 143 conflicts with any other provision of State or local law, the more stringent provision shall apply; provided, however that, to the extent that any provision of Chapter 143 as applied to an alternative onsite sewage systems (AOSS) is deemed to be additional to or more stringent than the requirements and standards for alternative onsite sewage systems of the State Board of Health, then this chapter shall apply to the greatest extent possible and the said State requirements and standards shall apply if (i) sewers or sewerage disposal facilities are not available in the area of the subject property, and (ii) the alternative onsite sewage system used on the subject site has been approved by the State Board of Health for use in the particular circumstances and conditions in which it is to be operating.

To that end, standards and procedures for soil evaluation, system siting and system design and installation are addressed herein, followed by conditions for obtaining a variance to the provisions of this article and the penalties associated with the violation of this article. Definitions of technical terms contained herein are addressed in § 143-72.

This Ordinance shall be administered and enforced by the Zoning Administrator **and the** Health Department who shall have all necessary authority on behalf of the governing body to administer and enforce the Ordinance, including the ordering in writing of the remedying of any condition found in violation, and the bringing of legal action to compel compliance with the Ordinance or provide for the imposition of the penalties hereinafter provided. The assistance of appropriate officials of Clarke County, including but not limited to, the Health Department, Zoning Administrator, Sheriff, and the Commonweath's Attorney shall be provided upon request.

A.This article is based on the current Virginia Department of Health's Sewage Handling and Disposal Regulations, as amended, but extends some of the requirements of that document in order to meet the special needs of Clarke County's fragile hydrogeology, as allowed by the Code of Virginia.

#### § 143-7.2 Definitions.

[Added 1995-12-19; Amended 2004-04-20; 2005-03-15; 2007-03-20] Definitions of terms contained in this article shall be those given in the Sewage Handling and Disposal Regulations, Virginia Department of Health (VDH), as amended, except as noted herein. The following definitions shall apply:

"Alternative discharging sewage system" shall mean any device or system which results in a point source discharge of treated sewage for which the State Board of Health may issue a permit authorizing construction and operation when such system is regulated by the State Water Control Board pursuant to a general Virginia Pollutant Discharge Elimination System (VPDES) permit issued for an individual single family dwelling with flows less than or equal to 1,000 gallons per day.

"Alternative onsite sewage system (AOSS)" shall mean a treatment works that is not a conventional onsite sewage system and does not result in a point source discharge."

"Approved method of the disposal of sewage" means water carriage disposal of sewage to an approved public or private sewage treatment system; water carriage disposal of sewage to an approved onsite sewage treatment system; or non-water carriage disposal of human excrement only to an approved pit privy, portable toilet, or other approved privy facility.

"Conventional onsite sewage system (COSS)" shall mean a treatment works consisting of one or more septic tanks with gravity, pumped, or siphoned conveyance to a gravity distributed subsurface drainfield.

"County" means Clarke County, Virginia.

"Cr horizon" means weathered or soft bedrock and is used to indicate root restrictive layers of bedrock.

"Drainage way" means the concave portion of the landscape in which surface water or rain water runoff gathers intermittently to flow to a lower elevation.

"Electrical Resistivity tests Investigation (ERI)" A test used to determine if there are voids or other anomalies located beneath the proposed soil treatment area.

"Enhanced flow distribution" means a pumping system designed to have a minimum capacity of 36 gallons per minute at system head per 1200 linear feet of percolation piping.

"Floodplain" Any land area susceptible to being inundated by water from any source.

"Flood Plain Overlay District" Lands zoned Flood Plain (FP) Overlay District as described in the Clarke County Zoning Ordinance (County Code Chapter 200), Section 4.2.1.

"Floodplain, Ten-Year" The floodplain that is at or below the ten-year flood elevation, that is, the area which has a minimum statistical probability of one in ten of being flooded in any given year. The

ten-year floodplain shall be regulated as delineated in the Clarke County Floodplain Study prepared by Dewberry and Davis (September 1, 1997).

"Geotechnical Engineer/Engineering Geologist" (GE/EG): a Virginia Certified Professional Engineer specializing in geotechnical engineering or a Virginia Certified Professional Geologist specializing in geotechnical engineering geology, either with a minimum of 5-years experience.

"Health Department"-- The Clarke County Office of the Virginia Department of Health (VDH) and its authorized employees and agents.

"Inspection" means surveillance procedures as used by the Health Department to determine compliance with the provisions of this chapter and State regulations.

"Limiting Feature" — A feature of the soil that limits or intercepts the vertical movement of water, including seasonal, perched, or permanent water table, soil horizons having an estimated or measured percolation rate greater than 120 minutes per inch, soils having a high shrink-swell potential, fragipans or other pans, soil restrictions and impervious strata, soil horizons containing greater than 75% (by volume) coarse fragments, and pervious or impervious bedrock. The Soil Survey of Clarke County, Virginia, 1982 shall be consulted for soil characteristic information such as soil type, permeability, and high shrink-swell potential.

"Lithic Contact" means the boundary between soil and underlying bedrock that is sufficiently coherent when moist to make hand digging impractical. Cracks that can be penetrated by roots must be > 4 inches apart

"Lithic rock" means partially weathered to unweathered rock material which cannot be bored using a standard, hand-operated three and one-quarter inch barrel auger and sixteen-inch cross handle, or upon which refusal is encountered when using a backhoe.

"Losing Stream" means perennial or intermittent stream which loses flow volume into its bed due to the presence of sub-channel (hyporheic) solution cavities or conduits.

"Natural outlet" means any outlet into a watercourse, pond, ditch, lake or other body of surface or ground water. Open throat sinkholes, swallets, and losing streams are considered natural outlets into the groundwater.

"Onsite Sewage Treatment System" means a complete system for the collection, treatment and disposal of sewage constructed on the property it serves or by easement on another parcel. This includes conventional, alternative and alternative discharging systems.

"Onsite soil evaluator (OSE)" means a person licensed or certified under Chapter 23 (§ 54.1- 2300 et seq.) of Title 54.1 of the Code of Virginia.

"Paralithic rock" means weathered rock material which may be found above lithic rock and below the natural soil.

"Parapet" means the discernable outer edge or perimeter of a sinkhole.

"Percolation test" means a standardized water test used to determine the rate of water absorption by soil.

"Pit privy" means a pit for receiving non-water carriage of human waste, over which is placed a privy house with seats.

Point source discharge" means any discernible, confined, and discrete conveyance including any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel, or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture or agricultural storm water run-off.

"Portable Toilet" means a manufactured, portable structure maintained by a licensed operator containing chemicals to neutralize odors, and made specifically for the use of waste disposal.

"Professional Engineer (PE)" means a person licensed or certified under Chapter 4 (§ 54.1-400 et seq.) as a professional engineer.

"Restrictive strata" means soil or soil materials with an estimated or measured percolation rate in excess of 120 minutes per inch, including fragipans or other pans, lithic rock, paralithic rock and Cr horizons.

"Sanitary sewer or public sewer" is a carriage system specifically for transporting sewage from houses and commercial buildings through pipes to a public sewage treatment plant.

"Seasonal water table" means the minimum depth to seasonal water table. As used herein, "seasonal water table" means that portion of the soil profile where a color change has occurred in the soil as a result of saturated soil conditions or where soil concretions have formed. Typical colors are gray iron depletions, solid gray or black masses or concretions, or other low chroma redoximorphic depletions as described in the Munsell soil color charts. The depth in the soil at which these conditions first occur is termed "seasonal water table."

"Septage" means the mat of grease and scum on the surface of septic tanks, the accumulated sludge at the bottom of tanks and the sewage present at the time of pumping.

"Septic tank" means a settling tank in which part of the heavy solids are settled and the organic solids decompose by anaerobic bacterial action.

"Sewage" means human excrement and the liquid wastes derived from dwellings, business establishments, institutions and other structures or places used for human habitation, employment or congregation, exclusive of those wastes derived from industrial processes.

"Sinkhole" means a basin- or funnel-shaped hollow or depression in limestone, dolostone or other soluble bedrock, ranging in diameter from less than a a few feet up to a several hundred feet and in depth from a few to several hundred feet. Some sinkholes are gentle grassy hollows or depressions; others are rocky cliff-bounded basins. A distinction may be made by direct solution of the limestone surface zone (solution sinkholes), and those formed by collapse over a cave (collapse sinkholes), but it is generally not possible to establish the origin of individual examples.

"Sinking Stream/Swallet" means a perennial or intermittent stream whose bed and bank disappear entirely underground, usually through an open throat sinkhole or cave entrance.

"Site and Soil Verification" means a full level 2 review prior to submittal of the application for a new sewage onsite system application. A Level 2 review (field check or quality assurance check) is a detailed onsite evaluation of the site conditions.

"Slope" means the incline surface of a hill, mountain, etc., or any part of the surface of the earth. "Slope" also means the angle at which such surfaces deviate from the horizontal, commonly expressed in percent.

"Soil/site evaluation" means a systematic approach to evaluation of soil conditions by a Commonwealth of Virginia Department of Professional and Occupational Regulation (DPOR) licensed onsite soil evaluator.

"Soil absorption area or soil absorption system" means a physical location in the naturally occurring soil medium where final treatment and dispersal of effluent occurs.

"Spring" – A natural issue of water from the earth or a rock formation or fracture onto the land or into a body of water via defined channel, the place of issuance being relatively restricted in size; or

- shown as a spring on the USGS 71/2-Inch Quadrangle Map (incomplete) or, Virginia Division of Mineral Resources Publication 102, Map of Hydrogeologic Components for Clarke County, Virginia Plate 2 (incomplete); or
- identified as a spring in the USGS Water-Resources Investigations Report 90-413, Ground-Water Hydrology and Quality in the Valley and Ridge and Blue Ridge Physiographic Provinces of Clarke County, Virginia; or
- 3) which is currently used as a domestic drinking water source, but is not a well; or,
- 4) which is currently used as a source of water for watering animals, but is not a pond or stream; or,
- 5) which feeds a pond or lake less than 500 feet from where the spring issues; or,
- 6) which has been designated as a significant hydrologic feature by the Clarke County Board of Supervisors prior to the filing of an application for an on-site waste disposal system (a list of such designated features is on file with the Clarke County Planning Department); or
- 7) which by right may be used as a source of water by an adjoining property owner; or
- 8) which has manmade features indicating past or present use as a water supply.

"Spring Conservation Overlay District" Lands zoned Spring Conservation (SC) Overlay District as described in the Clarke County Zoning Ordinance (County Code Chapter 200), Section 4.2.2.

"Standard disinfection" means a disinfection process that results in a fecal coliform concentration of less than or equal to 200 colonies/100 ml.

"Streams, intermittent or perennial" Any stream that is depicted as intermittent or perennial on the most recent U.S. Geological Survey 7½ minute topographic quadrangle (scale 1:24,000). A millrace or other such manmade flowing surface water shall be considered an intermittent stream. The Shenandoah River and Opequon Creek shall be considered perennial streams.

"Sullage" means waste from household, sinks, showers and baths but not toilets.

"Time dose distribution" means a pumping system designed to dose effluent evenly throughout a given time period.

"Treatment level 2 effluent" or "TL-2 effluent" means secondary effluent that has been treated to produce five-day biochemical oxygen demand BOD5 and total suspended solids TSS concentrations equal to or less than 30 mg/l each.

"Treatment level 3 effluent" or "TL-3 effluent" means effluent that has been treated to produce BOD5 and TSS concentrations equal to or less than 10 mg/l each.

"Vault privy" means a watertight chamber for receiving non-water carriage of human waste, over which is placed a privy house with seats.

"Virginia pollutant discharge elimination system permit VPDES" means a permit issued by the State Water Control Board SWCB under the authority of the federal National Pollutant Discharge Elimination System NPDES program.

#### 143- 3. Approved Method of Sewage Disposal Required

A. No person shall use or occupy, or rent or lease for use or occupancy, any house, trailer, mobile home, whether self-propelled or not, warehouse, public or private building or other structure or gathering place in which there is human habitation, employment or congregation, until such house, trailer, mobile home, warehouse, public or private building or other structure or gathering place is supplied with an adequate, approved method for the disposal of sewage as provided for in this chapter or by sanitary sewer.

- B. Following the effective date of this chapter, no person shall construct a new dwelling unit unless and until it can be furnished with minimum sanitary facilities to include a toilet, hand lavatory, tub and/or shower and kitchen sink, inasmuch as these minimum facilities are necessary to proper sanitation. All such fixtures shall be supplied with hot and cold running water, with the exception of the flush toilet. In new units intended for purposes other than use as dwelling units where tubs and/or showers are not necessary for sanitation, minimum facilities shall consist of at least a toilet and hand lavatory with hot and cold running water.
- C. Alternative discharging systems are not permitted.
- D. Mass drainfields are not permitted.

§ 143-1 4. Permit for installation. It shall be unlawful for any person to install or have installed in the county an onsite sewage system without first obtaining a permit from the Health Department.

- A. Education Requirement Prior to issuance of an operation permit for an Onsite Sewage System, the applicant shall be required to review educational material describing the operation and maintenance requirements for such system and demonstrate a basic understanding of the requirements by completing a short questionnaire provided by the Health Department.
- B. Permits issued prior to December 15, 1987, shall be subject to provisions of this article after July 1, 1992.
- C. B. Conditional permits shall not be issued for applications submitted after November 19,2002, unless specifically requested by the Health Department and only if approved by the Board of Septic & Well Appeals.

#### § 143-5 LICENSE REQUIREMENTS FOR INSTALLERS.

- A. License. No person shall install, repair or contract to install or repair individual onsite sewage treatment systems or parts thereof without first obtaining a license therefor from the DPOR
- **B. Sewage Handling Permit.** No person shall engage in the business of cleaning septic tanks, settling tanks and/or vaults designed to hold or retain solids and/or liquids in conjunction with any sewage disposal system, by whatever name called, without first obtaining a sewage handling permit from the Health Department.
- C. Disposition of sludge. It shall be unlawful for any person to dispose of the sludge and other material removed from septic tanks except by depositing it into a sewage treatment plant approved for such disposal.

#### 143-6 INSPECTIONS OF EXISTING SYSTEMS

The Health Department shall inspect all existing system component replacements. Existing components include building sewers, distribution boxes, conveyance lines and header pipes. Contractors replacing existing system components shall submit for a County only permit detailing the

changes to the existing system for inspection, review and approval or denial by the Health Department.

In addition, the Health Department may inspect the entire system of sewage treatment maintained at all premises in the County for the purpose of determining if such is being operated and maintained in a sanitary manner. Such inspection shall be done at reasonable times and, whenever practical, in the company of the owner or occupant of the premises.

The Health Department shall make such inspections as may be deemed necessary during the construction of any sewage treatment system installed in the County to determine compliance with this chapter and State Board of Health regulations. No person shall use, allow to be used or cause to be used, any system until after the Health Department has inspected and approved the same in writing. No part of any system shall be covered until it is inspected and approved by the Health Department, and any such part which has been covered prior to inspection shall be uncovered for inspection upon order of the Health Department. In extraordinary circumstances, the Health Department may approve system installations when reasonable professional judgment indicates a revisit is not practical or feasible or an inspection has been conducted by an onsite soil evaluator or professional engineer.

#### § 143-7 RESPONSIBILITY OF OWNER OF SYSTEM.

No owner, tenant or lessee of any premises properly supplied with an approved method of disposal of sewage shall misuse or neglect such a system or any part thereof so as to cause it to cease functioning as designed in a sanitary manner. The issuance of a permit, subsequent installation and acceptance of the onsite sewage treatment system upon inspection by the Health Department does not denote or imply any guarantee of operation of such system, and it shall be the responsibility of the owner, or any subsequent owner of the system, to maintain, repair or replace any system which has ceased to function as designed in a sanitary manner. The system shall be maintained and operated by the property owner to conform to the requirements of the State Board of Health.

Article II DETERMINING SUITABILITY OF SOIL/SITES FOR ONSITE SEWAGE TREATMENT SYSTEMS. § 143-2.

#### § 143-8 INSPECTION AND APPROVAL OF DESIGN AND LOCATION (NEW SYSTEMS).

The Health Department, OSE, and/or PE shall determine whether or not the land available for the installation of an onsite sewage treatment system is adequate and satisfactory as to size, topography, characteristics of the soil, and the nature and location of the water supply. The Health Department, OSE, and/or PE shall be responsible for approving the system design and capacity and the location of the septic tank. (\* Moved owner of system statement to 143-7 where it fits best ) The Health Department shall conduct a "Site and Soil Verification" of all proposed onsite sewage treatment system sites prior to submittal of an application.

- A. Septic tanks shall be inspected and approved by the Health Department before they are permitted to be used.
- B. The Health Department may inspect any and all onsite sewage disposal systems maintained at all premises in the County for the purpose of determining if such system is being operated and

maintained in a sanitary manner. Such inspection shall be done at reasonable times and, whenever practical, in the company of the owner or occupant of the premises.

- C. Prior to issuance of an operations permit by the Health Department, any Alternative Onsite Sewage System located within an active livestock area (pasture) must be fenced so as to exclude access by livestock. In all other areas vehicular access must be prevented by fencing or landscaping the system site.
- D. No alternative onsite sewer system shall be approved for use until the owner or owners of the property have provided to the County a written indemnity agreement, in a form approved by the County, indemnifying the County and other property owners in the County from any damages or liabilities resulting from the malfunction or failure of the alternative onsite sewer system. The indemnity agreement shall remain in force for the duration of the validity of the permit for the alternative onsite sewer system. In the event of the sale or conveyance of the property, the owner may obtain a release of the indemnity agreement upon the new owner or owners providing the required indemnity agreement.

#### § 143-8-9 Soil evaluation criteria; field testing.

[Amended 2005-03-15] Minimal soil evaluation criteria for suitability of an onsite sewage system are established in this ordinance and the current Sewage Handling and Disposal Regulations, Virginia Department of Health (VDH), as amended. \*moved here Backhoes are required for Health Department soil/site evaluations and verifications of private sector submitted soil/site evaluations unless waived by the Health Department. Soil characteristics shall be evaluated estimated by field-testing by the Health Department or by an OSE and/or PE and reviewed by the Health Department by "Site and Soils Verification".

with the Department of Professional and Occupational Regulation (DPOR) Board of Waterworks and Wastewater Works Operators and Onsite Sewage System Professionals. The Soil Survey of Clarke County, Virginia, 1982, provides a general guide for soil treatment area suitability, but is not definitive for individual onsite sewage systems.

- A. Closure of Onsite Inspection Pits. Any property owner causing or permitting inspection pits to be excavated for the purpose of determining soil suitability for the installation of a septic system shall have the pits filled within thirty days of final determination of suitability of the site for installation of a system. "Final determination" shall be defined as the latter of the following: the date of determination of suitability or unsuitability by the Health Department; the date of a determination of suitability by a licensed Onsite Soil Evaluator, or, the date of any decision by any appellate board or court having review jurisdiction.
- B. The Health Department, OSE, or PE and excavation contractors providing service relating to the investigation of suitability of any site for the installation of an onsite sewage system shall inform property owners of this requirement of the Clarke County Code. Failure of any of the above to so notify the property owner shall not be a defense against non-compliance.

#### § 143-10 Determining suitability of soil/sites for onsite sewage treatment systems

A permit for construction of an onsite sewage treatment system on an individual lot or property shall be issued after completion of a satisfactory evaluation which indicates that such a system can be installed and is expected to perform in a sanitary manner so as not to create a health hazard.

- A. Evaluation. Soil evaluation reports submitted for onsite sewage treatment system approval shall contain detailed soil/site investigations, as described in subsection D. hereof. Evaluations shall indicate whether or not the soils meet the criteria specified herein for the installation of the type of on-site sewage treatment system proposed. In addition to information gathered during the soils and geotechnical investigation, the topography, available area, proximity to ground and drinking water supplies, proximity to bodies of water, rates of water absorption by the soil horizon proposed for use, or a combination of any of the above, shall also be considered in such evaluation. If absorption rate problems are suspected, percolation tests or other infiltration tests may be required, but their results shall not be presumptive, prima-facie or conclusive evidence as to the suitability for effluent absorption. Soil reports shall be field reviewed by the Health Department unless administratively denied or deemed approved. \*Moved this backhoe sentence to 143-10 next to last sentence.)
- B. Site Sketch <del>Plot</del> and Structure Identification. A <del>plot</del> sketch, prepared by the applicant, is to accompany all applications for permits to construct on-site sewage treatment systems and must show accurately:
  - 1. The dimensions of the property.
  - 2. Proposed and/or existing structures and driveways.
  - 3. Underground utilities.
  - 4. Adjacent sewage treatment systems.
  - 5. Bodies of water.
  - 6. Drainageways and floodplains.
  - 7. Wells and springs within a 200-foot radius of the edge of the proposed onsite sewage treatment system, **and springs within 500' if at a lower elevation than a** proposed onsite sewage treatment system in Karst areas.
  - 8. Any surface karst features including sinkholes, cave entrances, losing streams or swallets, or any place where surface water is preferentially being absorbed into the subsurface at a higher rate than in the surrounding terrain.

#### C. Soil Profiles.

- 1. Depth of profile hole. The minimum depth of the profile hole shall be five feet, or deep enough to verify all stand offs unless prevented or made unnecessary by some physical feature of the soil, such as redoximorphic features, rock or when a potential horizon is found at a lesser depth. When a potential soil horizon is considered for use, the soil evaluation shall be extended below the soil horizon, with potential for use, to ensure that there is no interference with seasonal high water tables, lithic rock, paralithic rock or other impervious strata within the vertical offset limitation.
- 2. Number and location of profile holes. A minimum of five holes is necessary to determine the design requirements of an area for the placement of any soil absorption area. Holes shall be evenly placed to bound the area under consideration with one hole installed in the center. If more than one area is

required in which to install the soil absorption area, each area shall be evaluated with at least three profile holes. The actual area and number of profile holes necessary shall be determined on a case-by-case basis.

- D. Requirements for a detailed soil/site evaluation. Detailed soil-site evaluation reports generated for any proposed onsite sewage treatment system are required by and are to be submitted to the Health Department. A detailed investigation may also be required by the Health Director for specialized land use applications such as solid waste operations, composting facilities or other similar uses. The detailed soil/site evaluation report should include the following, where appropriate, unless determined by the Health Director, at the request of the developer, to be inapplicable based upon sound engineering principals:
  - 1. Results of field investigation.
    - a. A map, drawn to 1:2,400 scale (1 inch = 200 feet) and larger, as requested on a sheet twenty-four inches by thirty-six inches. Where small tracts are involved, an eight by eleven-inch sheet may be acceptable, provided it complies with all other requirements set forth herein.
    - b. Existing water supplies within 100 feet of the property and 200 feet of sewage treatment systems on the property.
    - c. The location of all backhoe pits. Test holes are to be numbered and located dimensionally, including surface elevations.
    - d. The location of all numbered proposed on-site soil absorption areas, if applicable. All soil absorption areas must be shown on contour and delineated by five pits.
    - e. The following items as they relate to the proposal, if applicable:
      - 1. The landscape type and position, the slope, topography and the surface drainage.
      - 2. The soil morphology, including the texture, color, structure, consistency, depth, lithologic discontinuities, boundaries, etc.
      - 3. The permeability, internal drainage and perched water tables.
      - 4. The parent material and associated problems.
      - 5. Restrictive strata.
    - f. The soil evaluation form.
  - 2. The following items shall be required in the report when soil absorption areas are proposed:
    - a. Depth of installation, type of system, relative suitability and modifications.
    - b. Recommendations and conclusions for repairing existing malfunctioning onsite sewage treatment systems.
    - c. Potential impacts on ground and surface water.
  - 3. Field logs. Soil profile descriptions taken from backhoe pits shall include:
    - a. The profile hole numbers.
    - b. The depth, thickness and description of each horizon, including paralithic and lithic contacts encountered.
    - c. Locations of all samples taken and analyses to be conducted on each sample.

- d. The depth to perched water and/or the ground water table if observed (or if indicated by soil color patterns).
- e. The name and title of the person responsible for the description and sampling.

#### § 143-9 11. System siting

[Adopted 1999-08-17; Amended 2004-06-15; 2005-03-15; 2005-07-19, 2008-12-16; 2016-12-20]

**A. For Lots zoned** Spring Conservation Overlay District (SC) as described in Section 3-E-2 b Section 4.2.2 of the Clarke County Zoning Ordinance:

- a. No new onsite sewage disposal systems shall be located within 1,000 feet of Prospect Hill Spring.
- b. Onsite sewage treatment systems shall be an alternative onsite sewage system (AOSS) designed to produce a minimum of treatment level 2 (TL-2) effluent, with soil absorption areas sized at (1.5 times the normal size)
- **c.** Alternative systems not utilizing pressurized dispersal methods must provide unsaturated soil conditions (enhanced flow) within the soil treatment area.
- d. A 100% reserve area shall be provided for each system.
- e. Installation of any onsite sewage treatment system shall be inspected and approved by the County's designated engineer or representative.
- f. Lot owners of all parcels shall be required to have septic systems maintained at least once every five years or as recommended based on system type. Maintenance will consist of pump out if determined necessary by a qualified septic hauler, and clean out and leveling of distribution boxes and associated lines.
- B. In all cases, the soil and site evaluation shall determine if a Conventional Onsite Sewage System (COSS) can be designed to serve the proposed use. If so, the COSS shall be proposed, unless explicitly directed otherwise such as in the Spring Conservation Overlay District. If a COSS cannot be designed for the site, a statement must accompany the soil evaluation, signed by a licensed Onsite Soil Evaluator that states the site restrictions that restrict the site to an AOSS.
- C. Soil restrictions for Onsite Sewage Treatment Systems.

The following Table 1 details the soil restrictions for soil absorption system installation. In all cases, systems shall be installed below the ground surface in naturally occurring in-situ (undisturbed) soils as indicated:

Table 1.

		sidewalls (horizontal)	bottom (vertical)
Distance to rock/restrictive strata –			
Non-karst (COSS)		24"	24"
Distance to rock/restrictive strata –			
Karst (COSS)		24"	24"
AOSS	TL-2	18"	18"

AOSS	TL-3	18"	18"
Distance to seasonal water table (COSS)			20"
AOSS	TL-2		18"
AOSS	TL-3		18"

- (1) Alternative Onsite Sewage Systems must be installed a minimum depth of 3" below the ground surface in naturally occurring, undisturbed in-situ soil.
- a. In karst soils as defined in Section 143-9-G installation of the dispersal system must be no shallower than 10" inches.
- b. In all other soils Installation of the dispersal system must be no shallower than 3" or half the total depth of the A, A1 and A2 horizons, whichever is greater.
- (2) Conventional Onsite Sewage Systems must be installed a minimum of 18 inches below the ground surface in naturally occurring, in-situ soil.
- (3) Onsite Sewage Systems installed at less than 18" depth require at least 12 inches of soil cover in the soil treatment area.unless the system is an AOSS installed in a wooded area where trees will not be removed.
- (4) Effluent dispersed from an AOSS, may only be discharged to a soil treatment area when the vertical and horizontal separation from the soil treatment area to a limiting feature consists of at least 18 inches of naturally-occurring, in-situ soil.
- (5) Effluent dispersed from a COSS may only be discharged to a soil treatment area when the vertical and horizontal separation from the soil treatment area to a permeability limiting feature consists of at least 24 inches of naturally-occurring, in-situ soil, and the vertical separation to seasonal water table, seasonal wetness indicators, or pervious strata must be a minimum of 20 inches.
- (6) Onsite Sewage System soil treatment areas shall be a minimum of 10 feet horizontally from surface rock outcrops.
- (4) Onsite Sewage System soil treatment areas, utilizing gravel less dispersal, shall have no reduced footprints.
- (5) Onsite Sewage Systems shall not be installed in soil horizons having "high shrink-swell potential", soils classified as "poorly drained" or having "slow permeability", or having known descriptions of pans of any type. A soil test is required to confirm the aforementioned characteristics. If the percolation rate is satisfactory, all vertical and horizontal siting requirements must also be satisfied.

#### (C) Site Restrictions

[Amended 2005-03-15; 2016-12-20] Minimum distances between components of septic systems and site features are prescribed in the current Sewage Handling and Disposal Regulations, Virginia Department of Health, as amended.

Onsite sewage treatment system components shall be prohibited or restricted on sites as described in Table 2, Minimum Separation Distances.

Table 2: Minimum Separation Distances
Minimum Distance From

Structure or Topographic Features	Soil Treatment Area (feet)	Septic Tanks or Vault Privies (feet)	All Other Parts of the Septic System (feet)
Slopes greater than 25%	Not permitted	N/A	N/A
Flood Plain (Ten-Year)	Not permitted	Not permitted	Not permitted
Free flowing streams, natural lakes or impounded waters (measured from edge)	100	100	50
Intermittent stream	50	50	50
Drainageways (measured from low point)	50	50	N/A
Wells	100	100	50
Surface Rock Outcrops	Karst: 10' Non-karst: 2'	Karst: 10' Non-karst: 2'	N/A N/A
Parapet (visually discernible edge) of sinkholes and cave entrances	100	100	50
Springs at a lower elevation than the septic system	Karst: 500 Non-karst: 200*	Karst: 500 Non-karst: 200*	Karst: 100 Non-karst: 100

Structure or Topographic Features	Soil Treatment Area (feet)	Septic Tanks or Vault Privies (feet)	All Other Parts of the Septic System (feet)
Springs at a higher elevation than the septic system	Karst: 200	Karst: 200	Karst: 100
	Non-karst:	Non-karst:	Non-
	100	100	karst:100
Utility Easement (edge of) Upslope Downslope	10	10	10
	25	25	10

N/A = Not applicable.

NOTE: In the event that there is disagreement between an OSE and/or PE and the Health Department regarding whether a natural outflow of water from an underground supply to the ground surface is a spring or a seep, then it shall be determined by a licensed professional geologist or hydrologist.

Moved to Table 2 C. Floodplain. New onsite sewage systems shall not be permitted in the floodway portion of the Flood Plain District. in the ten-year floodplain.

- (1). The distance from the structure served by the onsite sewage treatment system to the nearest point of the soil treatment area shall not be greater than 500 feet. [Added 2004-06-15, Amended 2010-06-15]
  - (2). Driveways and parking areas. Driveways and parking areas shall be a minimum of 10 feet from onsite sewage treatment systems except for sewer and conveyance lines crossing the area and soil absorption areas designed to be placed under paved surfaces.
- (3) Minimum Size. For onsite sewage treatment systems using trench dispersal, the size of the soil absorption area based on the square footage of the trench bottoms shall consist of a minimum of 600 square feet. Drip disposal systems or any systems installed shallower than 6" shall have a minimum square footage of 1200 sq. ft.
- (4) Reserve area. An onsite sewage system reserve area with a capacity at least equal to that of the primary area (100%) shall be provided in accordance with the provisions of this article regardless of parcel recordation date. If existing lots must be merged to create a satisfactory building lot, then a 100% reserve area is required.
- (5) Replacement **and** repairs, <del>and expansions</del> of existing approved onsite sewage treatment systems, may encroach on minimum separation distances for site features listed in Table 2, so long as they are no closer to those features than the existing onsite sewage treatment system and so long as the encroachment is not likely to cause a significant threat to public health or the environment as determined by the Health Department. [Added 99-08-17, Amended 10-06-15]

<sup>\*</sup>Refer to Item (6) below.

- (6) Setback distance exceptions for onsite sewage disposal areas in non-karst soil areas for lots of record in existence prior to November 17, 1987, the setback distance from a spring at a lower elevation than a proposed onsite sewage system may be reduced below 200' provided:
  - 1. The spring location, the proposed onsite sewage disposal area, and the impact area between the two features shall be identified as Non-Karst soil areas.
  - 2. The spring is not used as a domestic drinking water supply or identified as a developed spring by the Virginia Department of Health.
  - 3. The minimum allowable setback is 100 feet.
  - 4. The proposed onsite sewage disposal system disperses at least a "TL-3 effluent" standard as defined by the Virginia Department of Health Regulations for Alternative Onsite Sewage Systems as effluent that has been treated to produce  $BOD_5$  and TSS concentrations equal to or less than 10 mg/l each.
  - 5. A detailed public health and safety narrative report shall be provided by a licensed Onsite Soil Evaluator. This report shall include:
    - a. Explanation of the site conditions and design of the septic system
    - b. Assurance that all conditions noted in this section are satisfied.
    - c. An affidavit stating that an onsite sewage disposal system is unable to be located on the property meeting this requirement and that the location of the proposed onsite sewage system meets this requirement to the greatest extent possible being located as far from the spring as is feasible.
    - d. A listing of recommendations to mitigate any potential degradation of and effect on the groundwater.
    - e. The proposed onsite sewage disposal system meets all State and County requirements.
- (E) Moved from above Explosives or pneumatic hammers. The use of explosives or pneumatic hammers (other than hand-held pneumatic hammers) shall not be permitted for the excavation associated with septic tanks or onsite sewage treatment systems or within 50 feet of any soil treatment areas (except blasting may be permitted for installation of one-piece septic tanks fitted with rubber boots)

Move to 143-14 Installation section K. Removal of vegetation. Vegetation, such as maples, willows and other plant species with extremely hydrophilic (water loving) root systems, shall be removed at least ten feet from the actual absorption areas. All trees should be removed from the absorption area.

- (F) Easements. Easements for off-site installation of onsite sewage systems are not permitted:
  - 1. Except for residences constructed prior to December 15, 1987.
  - 2. Except for commercial uses:

a. Located in a commercial zoning district.

b. In operation prior to March 17, 1992, or located on a previously undeveloped parcel in a commercial zoning district of less than three contiguous acres, zoned for commercial uses prior to December 15, 1992.

- 3. Provided that such off-site onsite sewage systems for such qualifying commercial uses:
  - a. Do not constitute a mass drain field (a sewage disposal system or systems which will discharge effluent to a single absorption area or multiple absorption areas with or without combined flows, such that the loading rate applied to any acre, as determined by the department, exceeds 1,200 gallons per day that is with loading rates in excess of 1,200 gallons per day for any acre and containing more than 2,000 linear feet of percolation piping).
  - b. Have a one-hundred-percent reserve area.
  - c. Have a maintenance program which includes pumping out of the septic tank every seven five years at a minimum.
  - d. Need not be located in a commercial zoning district.
  - e. Shall be shown on an approved site plan and placed under an easement, recorded in the land records of Clarke County within six months of site plan approval. Such easement shall show the land area encompassing the septic facilities, provide means of access and state the party responsible for the maintenance of the septic system.
  - f. Shall be abandoned if public sewer service becomes available to the property being served by the off-site septic system easement. Hookup to the public sewer system is required and the requirement for an easement shall terminate.

### 143-12 Subsurface Investigations [Added 2005-07-19]

This section is to establish review procedures and performance standards for non-invasive subsurface investigations designed to identify the potential for voids beneath primary and reserve onsite sewage system soil treatment areas so as to avoid locating in areas where subsidence may occur.

# Site Review

Whenever an application is filed for an onsite sewage treatment system permit or certification letter with the Health Department, except for emergency repair applications as determined by the Health Department, after July 19, 2005, in any region underlain with limestone, dolomite, calcareous shale, or marble, specifically described as areas containing soils derived from these materials, which include soil types (4, 5B, 5C, 10, 15B, 15C, 17B, 18, 23, 24, 30B, 31B, 32B, 33B, 35B, 35C, 36B, 36C, 37B, 38B, 38C, 38D2, 39B, 39C, 39D2, 43C, 44B, 45B, 46B, 47B, 47C, 48B, 51B, 55D, 56, 57C2, and 57D2, as identified in the Clarke County Soil Survey, 1982), the applicant will hire a Geotechnical Engineer (GE) to conduct Electrical Resistivity Investigation (ERI) to determine if voids or other anomalies are located beneath the proposed soil treatment area. **NOTE:** If the

area evaluated is shown as the soil types listed above, however based on field conditions observed by the OSE and/or PE it is determined to be a non-karst soils area, then the Health Department can be asked to review the site for the final determination. In the event that there is disagreement between an OSE and/or PE and the Health Department regarding karst or non-karst soils, then it shall be determined by a licensed professional geologist.

### **ERI Testing**

The ERI testing shall be performed by an individual with a 4-year degree in geology or engineering with a minimum of 2-years' experience conducting resistivity testing;

Testing shall utilize dipole-dipole resistivity surveying array;

Testing shall consist of a minimum of two lines laid out through the soil treatment area (two lines each primary and reserve area, unless contiguous), perpendicularly to the strike of the bedrock, and extending a minimum distance beyond the drain field area of 60 feet so as to provide a minimum depth of penetration of 20 feet at the edge of the field, and allow for movement of the field should irregularities be identified;

Testing shall include use of a minimum of 24 electrodes per 100 feet of line, so as to provide a minimum of 200 soundings;

Testing shall provide minimum reading depth of 40 feet;

Electrode contact resistance shall be less than 5000 ohms, if not a salt-water mix shall be poured over the soil where electrodes are placed;

Lines shall be clearly marked at each end with stakes or other identifiable markers;

The results of the ERI testing shall be evaluated and reported upon by an individual with a 4 year degree in geology or geotechnical engineering and a masters degree in geophysical studies or equivalent. (Equivalent shall consists of not less than 5 years experience in interpreting the results of geophysical investigations, in particular ERI.)

Results of test shall be included in a report which includes, in part, the following, to be provided to the county Natural Resource Planner:

- a. summary of methods,
- b. resistivity described in Ohm-meters,
- c. electrode spacing,
- d. directional orientation,
- e. plan maps describing the line layout and in relation to onsite system soil treatment areas
- f. color image profiles detailing the results and identifying any hazards, images shall maintain a consistently applied color scale ranging from blue-green-yellow-red, and indicate the location of the soil treatment area relative to the profile. The Ohm-m scale shall range from 0 to 4000 to provide consistency between consultants. Hazards shall be labeled on the profile so as to indicate the type of irregularity as described below,
- g. irregularities in the profile shall include pinnacle/cutter topography, float rocks, soft zones, voids, mud-filled voids, extreme fracturing, and any other such anomaly,
- h. the amount of overburden,

- i. surface elevations shall be integrated with ER profiles,
- j. discuss the significance of the geologic structure,
- k. quantify qualitative terms such as "low", "moderate" or "high" risk
- I. implications of findings, i.e. should drain fields be located as proposed, and if so why, and
- m. discuss the possible benefits if any of relocating a soil treatment area;
- If the profiles show anomalies, and **the ERI testing** engineer/geologist recommends use of the site, then air track drilling is recommended to explore rock discontinuities or anomalies. In questionable soil (like cutters) conventional test borings are preferable. In either case the drilling/test shall be conducted to determine the extent and significance of the anomaly. The location of drilling or borings shall be documented and the findings of each described in detail, including a summary of the implications of the feature, if the site continues to be recommended for use, and why the feature is inconsequential;
- If evidence of voids is documented beneath the proposed soil treatment area, or if anomalies encompass 20% or more of the proposed site, or the implications of findings recommend avoidance of the site, then the soil treatment area shall be relocated and the new area evaluated as described above; and

Subdivision plats and onsite sewage system permits shall include the following statement:

"Subsurface investigations have been conducted for the onsite sewage system sites on the parcels identified herein. Reports detailing the findings are available at the Clarke County Planning Department."

#### § 143-<del>10</del>.**12** Design and installation.

[Amended 2000-04-17; 2002-02-19; 2005-03-15; 2006-05-16; 2008-12-16; 2009-08-18; 2010-06-15; 2011-03-15]

- (A) Removal of vegetation. Vegetation, such as maples, willows and other plant species with extremely hydrophilic (water loving) root systems, shall be removed at least ten feet from the actual absorption areas. All trees should be removed from the absorption area.
- (B) Onsite sewage systems, that provide unsaturated soil conditions (enhanced flow) within the soil treatment area shall be required in the following soils:
  - 1. Soils that have an estimated or measured percolation rate of 16 or less minutes per inch.
  - 2. Soils that have an estimated or measured percolation rate of 91 to 120 minutes per inch.
- 3. Soil horizons containing between 50% and 75% (by volume) coarse fragments
- Lots zoned Spring Conservation Overlay District (SC) as described in Section 3-E-2-b Section 4.2.2
   of the Clarke County Zoning Ordinance. Moved to section 143-12-A
- B. Privies. The Health Department may issue permits only for portable or vault privies. No other type of new privy shall be permitted except in remote areas where vehicular access is unavailable. (Refer to § 143-12 Table 2 Minimum Separation Distances.)

#### 1. Portable privies.

- (a) Portable privies are allowed only for use in association with government owned facilities or for temporary activities such as construction sites, entertainment events or agricultural or forestry activities.
- (b) Within the Flood Plain District (one hundred year floodplain), portable privies: Within the Flood Plain Overlay District as described in Section 4.2.1 of the Clarke County Zoning Ordinance, portable privies:
  - [1] Require a permit from the Health Department.
  - [2] May not be located on a parcel for more than 15 consecutive days between October 1 and April 30.
  - [3] Shall be located at least two feet above the elevation of the annual floodplain.
  - [4] Shall be removed from the floodway **floodplain** of the Shenandoah River when flooding of the river is predicted by the National Weather Service.
  - [5] Shall submit a maintenance contract with the waste hauler, indicating that the privy will be pumped when the tank is 3/4 full, with the permit application.
- (c) Agricultural activities requiring the use of pit privies are exempt from Subsection B(1) and (2).
- 2. Vault privies are not allowed within the floodway **floodplain** of the Shenandoah River. Outside of the floodway **floodplain**, vault privies are allowed only for primitive recreational areas with intermittent use and no plumbing facilities. A maintenance contract with the waste hauler, indicating that the privy will be pumped when the tank is 3/4 full, shall be submitted with the permit application.
- 3. All non-portable privies within the floodway **floodplain** of the Shenandoah River shall be abandoned and removed by May 1, 1995. Abandonment and removal shall be accomplished by removing the structure, liming the pit and covering the pit with at least two feet of soil and otherwise complying with any applicable regulations of the State Board of Health for pit privy abandonment.
- C. Pump and Haul [Added 2000-04-17, Amended 2002-02-19]

  The Board of Septic and Well Appeals has the authority to approve a variance to this ordinance for the temporary pumping and hauling of untreated sewage (pump and haul) in lieu of onsite sewage treatment. Such variance requests must meet the criteria of Section 143-11-C-1-b.

#### **143-14** Reutilization of Existing system.

This section is to establish review procedures and performance standards for:

 The reutilization of existing on-site sewage disposal systems in the event of replacement of a structure having been lost by fire or other circumstances, or

- When the applicant desires to substantially modify an existing structure, which is defined as:
  - doubling the square footage of the structure; or
  - the construction value (as determined by the Building Department) is more than the assessed value (Commissioner of the Revenue), or
- When the applicant proposes a change of use, or
- When an existing system's use has been discontinued or utilized under design capacity.

A County official will determine the need for and must request an existing system review by the Health Department. Reviews are generally requested by the Building Department when there is a potential for well or septic encroachments.

In order to be considered for reutilization the following criteria must be met, as determined by the Health Department:

- The system must have no known history of failure or malfunction either since installation or previously authorized repair or replacement.
- Adequate information about the system must exist or be determined in order to make a judgment as to its adequacy for the proposed use. This information may include, but is not limited to, the following:
  - system location, landscape, setbacks, etc.
  - o tank size and integrity
  - o size of the absorption system
  - o construction and materials
  - o design plan
- The system shall be of a nature previously or presently approved by the Health Department.
- The owner shall supply evidence that the septic tank has been pumped within the last 5 years.
- The structure that the system is proposed to serve must have been in recent and continuous service, as determined by the Health Department. Any structure not in use for the previous two years must meet current standards for a new system.
- The proposed effluent quantity and strength shall not exceed the amount previously applied to the system unless it can be established the system was utilized below design capacity. In no case shall the original design capacity be exceeded.
- A reserve area shall be provided as described in Section 143-12-C-4.

# **System Evaluation**

In cases where Health Department records are insufficient, the following procedures shall be completed in order to determine the adequacy of the system:

 If needed, hold a preliminary fact-finding meeting with the applicant to discuss status of the existing system and requirements for completing a soil evaluation report, as-built drawings, and an inspection report.

- Conduct a physical walkover of the site to insure that there is no evidence of ponding on the ground surface. Also the perimeters of the site shall be checked to ensure that there are no discharges of sewage or gray water.
- Put dye in suspicious systems (possible straight pipes, wet spots, etc.) and conduct follow up visits as needed to ensure proper system operation.
- Note any structures, driveways, trees, etc. built over system components and make recommendations for removal as needed.
- Confirm the footprint of any new proposed addition conforms with current separation distances to sewage disposal system(s) and well(s).
- Any proposal for an increase in waste-loading rate more than the design will require a standard site and soil evaluation to pursue a septic system construction permit for expansion.
- At a minimum, all distribution boxes, both lids of the septic tank(s), and the end of the last line shall be uncovered by the owner for further evaluation.
- Check number of outlet ports and attempt to estimate size.

### Reporting

# The Health Department shall:

- Forward a letter to the County official requesting the evaluation that describes the system and any recommendations.
- A disclaimer shall be attached to the report stating, "This report is only intended to address the above referenced request. This report is not intended for use as part of a real estate transfer or any other unauthorized use. There is no implied guarantee of future system performance based on this report. In the event of sewage disposal malfunction, the owner will be responsible for any repairs or other actions deemed necessary to correct the situation."

#### § 143-<del>11</del> **15**. Appeals & variances.

[Amended 1999-08-17; 2000-04-17, 2002-02-19, 2004-02-17; 2005-08-16]

#### A. Board of Septic and Well Appeals

[Amended 1999-08-17; 2000-04-18; 2004-02-17; 2005-08-16]

- (1) Appeals of administrative interpretations of this article, and applications for variances, shall be heard by a Board of Septic and Well Appeals ("The Board").
- (2) The Board of Septic and Well Appeals shall consist of three members:
  - (a) a member of the Board of Supervisors, , with any other member of the Board designated as his/her alternate.
  - (b) a member of the of Planning Commission with any other member of the Planning Commission designated as his/her alternate, and
  - (c) a member of the public, who is a resident of the county with a member of the Planning Commission designated as his/her alternate. [Amended 2005-08-16]

All members shall be appointed by the Board of Supervisors at their first regular meeting of each year. [Added 1999-08-17, Amended 2004-02-17]

- (3) The Board shall have the following powers and duties:
  - (a) To hear and decide appeals from any order, requirement, decision or determination made by the Clarke County Health Department in the administration or enforcement of this article.
  - (b) To hear and decide applications for variances in accordance with the provisions of this section.
- B. Appeals. (1) Any appeal shall be filed within 30 days of the issuance date of the order, requirement, decision, or determination .
- (2) Any person seeking an appeal shall apply in writing to the Board. Such application shall include:
  - (a) A citation to the order, decision, determination or regulation to which an appeal of interpretation or application is requested;
  - (b) Any relevant analytical results, including results of tests conducted pursuant to the requirements of this article;
  - (c) Other information, if any, deemed pertinent by the applicant; and
  - (d) Such other information as the Board may require.
- (3) The Board shall act on any appeal request within 60 calendar days **from the Board's BSA's first** review of receipt.
- (4) All appeals shall be consistent with the intent of this article. The Board may attach reasonable conditions consistent with the intent of this article in granting appeals.
- (5) No appeal may be heard except after notice and hearing as required by § 15.2-2204, Code of Virginia and in accordance with the requirements of Section 10-E of the Clarke County Zoning Ordinance.
- (6) An appeal of a decision of the Board shall be made within 30 days to the Board of Supervisors. Any appeal of the decision of the Board of Supervisors shall be made within 30 days to the Circuit Court of Clarke County.
- (7) The concurring vote of two members shall be necessary to reverse any order, requirement, decision, or determination of an administrative officer, or to decide in favor of the applicant on any matter upon which the Board is required to pass under this Ordinance, or to effect any variance from the Ordinance. [Added 04-02-17]

# C. Variances.

[Amended 1998-04-21; 2001-01-16; 2002-02-19; 2004-02-17; 2004-09-21; 2005-08-16]

- (1) Variance criteria.
  - a. General (other than Temporary Pump and Haul). In order to be eligible for a variance, the system for which the variance is requested serves or is planned to serve one of the following:the applicant must meet one of the following criteria:

- (i) An existing single family dwelling or structure serving an existing business. A habitable building for which the variance is requested is currently occupied.
- (ii) An existing single family dwelling or structure serving an existing business that habitable building has been destroyed by circumstances beyond the control of the owner or occupant of the building within one year of the variance application.
- (iii) A—The building that is eligible to be on the Virginia Landmarks Register or the National Register of Historic Places or is eligible to be a contributing property in an historic district listed in the Virginia Landmarks Register or the National Register of Historic Places.
- (iv) The variance is requested so as to provide for septic systems or water supply systems replacing existing septic systems or water supply systems that are more consistent with the regulations of this article. An existing single family dwelling or structure serving an existing business habitable building must be located on the property with the existing septic system or water supply system.
  - (v) The entire parcel of land has been placed under a permanent conservation easement. granted to the Clarke County Conservation Easement Authority, Lord Fairfax Soil and Water Conservation District, Virginia Foundation and/or Virginia Board of Historic Resources.
  - (2) Variances shall be approved to alleviate a clearly demonstrable hardship approaching confiscation involving existing single family dwellings or structure serving an existing business improvements, as described in Section (C)(1), above, as distinguished from a special privilege or self-imposed (elective) convenience or option sought by the applicant. [Added 2001-01-16]

#### b. Temporary Pump and Haul.

- (i) Temporary pump and haul may be allowed if public sewer service or other means of approved sewage disposal is imminent and if all of the following criteria are met:
  - a)—The structure to be served is one of the following:
    - 1) An existing occupied dwelling;
    - 2)—An existing structure used as a place of worship;
    - 3) A new or existing school structure; or
    - A new or existing commercial structure on a property in a commercial zoning district;
       and
  - b) The Health Department has rejected an application for an onsite sewage system or an off-site system as permitted under this ordinance.
- (ii)—Temporary pump and haul may be allowed for up to three years if public sewer service or other means of approved sewage disposal is <u>not</u> imminent and if all of the following criteria are met:
  - a) The structure to be served is an existing dwelling without indoor plumbing and is converting to indoor plumbing, or an existing septic system has failed;
  - b)—For at least one continuous year, the applicant has been the owner and full-time resident of the dwelling to be served; and,
  - c) The Health Department has rejected an application for an onsite sewage system or an off-site septic system, as permitted under this ordinance

d) There shall be no additional bedrooms added to the dwelling as a result of the permitting of temporary pump and haul.

# (3) Variance procedure:

If the proposed variance involves a request to locate a soil treatment area farther than 500 feet from the single family dwelling or structure serving an existing business, the applicant must provide an affidavit signed by the soil consultant stating that no suitable area could be found within the 500 feet radius. Attached to the affidavit shall be a written report detailing the reasons why no site could be found, including but not limited to soil test pit locations and profiles, site conditions such as topography, and/or setback restrictions. [Added 05-08-16]

- (a) Any person seeking a variance shall apply in writing to the Board. Such application shall be in writing and shall include:
  - (i) A citation to the order, decision, determination or regulation from which a variance is requested.
  - (ii) Identification of which of the variance criteria in paragraph C.(1) applies;
  - (iii) The nature of the variance requested.
  - (iv) Any relevant analytical results, including results of tests conducted pursuant to the requirements of this article.
  - (v) Statements or evidence why the public health and welfare as well as the groundwater resources would not be degraded if the variance were granted.
  - (vi) Suggested conditions that might be imposed on the granting of a variance that would limit the detrimental impact on public health and welfare or groundwater resources.
  - (vii) Other information, if any, deemed pertinent by the applicant.
  - (viii) Such other information as the Board may require.
- (b) The Board of Septic And Well Appeals shall act on any variance request within 30 60 calendar days of receipt of the request
- (c) The Board may attach reasonable conditions consistent with the intent of this article in granting variances. Compliance with conditions shall be required for the life of the system for which the variance is issued, unless specified otherwise by the Board. If a variance is granted for a property eligible to be on the Virginia Landmarks Register or the National Register of Historic Places or is eligible to be a contributing property in an historic district in the Virginia Landmarks Register or the National Register of Historic Places, the property owner shall apply for a county historic overlay district for the subject property.
- (d) In acting upon a request for a pump and haul system the Board shall require the following:
  - (i) The maximum capacity of a sewage holding tank serving a residence shall be 3,000 gallons;
  - (ii) The property owner shall provide copies of an agreement to pump and haul the sewage with a contract hauler, holding a sewage handling permit, and a letter of acceptance from the operator of a certified sewage treatment plant. The property owner shall provide the county with a copy of the invoice(s) from the contract hauler every three months. A pump

- and haul variance shall be void if the property owner does not provide such an invoice, or a in the absence of an invoice, a letter of explanation, within any six month period;
- (iii) The property owner shall enter into an agreement with the county to construct and operate a pump and haul system in accord with all State Health Department regulations.
- (e) In acting upon a variance request for temporary pump and haul, the time limit for the pump and haul variance shall be determined by the board based on the circumstances of each application. However, the time limit for a pump and haul variance where public sewer service or other means of approved sewage disposal is not imminent shall be no longer than five years.
- (f) In granting a variance request for temporary pump and haul, the Board shall require a guarantee of the payment of hauling costs for the term of the variance, up to one year, in one of the following forms:
  - (i) cash escrow;
  - (ii) cash, corporate or property bond, with surety satisfactory to the board; or,
  - (iii) a bank letter of credit in a form satisfactory to the board.
- (g) A renewal of a variance for temporary pump and haul may be requested. In acting upon such request, the Board shall determine whether there have been any changes in conditions since the granting of the last variance that eliminates the need for a pump and haul system.
- (h) (d) No variance may be granted except after notice and hearing as required by §15.2-2204, Code of Virginia, and in accordance with the requirements of Section 10 E of the Clarke County Zoning Ordinance except as provided for in § 143-11C(2) of the County Code. Posting and notification of adjacent property owners are waived for existing failed systems requiring emergency repairs, which alter the configuration of the existing system as determined by the county Health Department.
- (i) (e) A denial of a variance, or an appeal from the terms and conditions set forth in the variance, shall be made within 30 days to the Board of Supervisors. Any appeal of the decision of the Board of Supervisors shall be made within 30 days to the Circuit Court of Clarke County.
- (i)—All variances are transferable unless otherwise stated.
- (k) (f) Each variance shall be attached to the **onsite sewage disposal system** permit to which it is granted **and shall remain in effect so long as the permit is valid**. Each variance is revoked when the permit to which it is attached is revoked.
- (I) Variances for emergency repairs shall be heard by the county Natural Resources Planner. The Natural Resources Planner shall consult with the Board of Septic Appeals before acting on such a variance request. [Amended 04-02-17]
- (m) Variances shall be approved to alleviate a clearly demonstrable hardship approaching confiscation involving existing improvements, as described in Section (C)(1), above, as distinguished from a special privilege or self-imposed (elective) convenience or option sought by the applicant. [Added 2001-01-16] moved to 2

(n) Variances shall be heard by the county Natural Resources Planner or Zoning Administrator for Systems that substantially comply with the intent of this ordinance. Substantial compliance is defined as a variance of not greater than 10% from the stated regulations. The Natural Resources Planner shall consult with the Board of Septic Appeals before acting on such a variance request. [Added 2004-02-17]

§ 143-16. Fees.

[Amended 1999-11-16; 2000-03-21, 2000-04-18]

The Board of Supervisors shall set by resolution such fees as it deems necessary and reasonable to defray the cost of permits and/or licenses, inspections and testing as are required to be issued under this article.

§ 143-17. Violations and penalties. Penalties for violation of the provisions of this article shall be as provided in Clarke County Code Chapter 1, General Provisions, Article I.

#### **Chapter 143 Septic Systems**

### **Code of Virginia References**

§ 15.2-1200 General Powers of Counties § 15.2-2157. Septic tanks and sewage disposal when sewers not available § 32.1-163 et seq. - Sewage disposal

### § 143-1 Intent; state regulations;

The intent of this article is to minimize the potential for groundwater contamination resulting from improper siting and construction of onsite sewage systems in Clarke County. Clarke County has Karst topography and fragile hydrogeology and has the potential for depletion and contamination of water sources and the potential for hazards to public health, safety and welfare as a result. To protect the health, safety and welfare of the general public, the standards as set forth hereafter in this chapter are established for all onsite sewage systems constructed or installed in the County. Pursuant to these goals, the Board of Supervisors hereby exercises its power, as granted by Sections 15.2-1200 and 15.2-2157 of the Code of Virginia (1950, as amended), to protect groundwater by regulating onsite sewage systems.

To the extent that any provision of this Chapter 143 conflicts with any other provision of State or local law, the more stringent provision shall apply; provided, however that, to the extent that any provision of Chapter 143 as applied to an alternative onsite sewage systems (AOSS) is deemed to be additional to or more stringent than the requirements and standards for alternative onsite sewage systems of the State Board of Health, then this chapter shall apply to the greatest extent possible and the said State requirements and standards shall apply if (i) sewers or sewerage disposal facilities are not available in the area of the subject property, and (ii) the alternative onsite sewage system used on the subject site has been approved by the State Board of Health for use in the particular circumstances and conditions in which it is to be operating.

To that end, standards and procedures for soil evaluation, system siting and system design and installation are addressed herein, followed by conditions for obtaining a variance to the provisions of this article and the penalties associated with the violation of this article. Definitions of technical terms contained herein are addressed in § 143-2.

This Ordinance shall be administered and enforced by the Zoning Administrator and the Health Department who shall have all necessary authority on behalf of the governing body to administer and enforce the Ordinance, including the ordering in writing of the remedying of any condition found in violation, and the bringing of legal action to compel compliance with the Ordinance or provide for the imposition of the penalties hereinafter provided.

# § 143.2 Definitions.

Definitions of terms contained in this article shall be those given in the Sewage Handling and Disposal Regulations, Virginia Department of Health (VDH), as amended, except as noted herein. The following definitions shall apply:

Alternative discharging sewage system	Any device or system which results in a point source discharge of treated sewage for which the State Board of Health may issue a permit authorizing construction and operation when such system is regulated by the State Water Control Board pursuant to a general Virginia Pollutant Discharge Elimination System (VPDES) permit issued for an individual single family dwelling with flows less than or equal to 1,000 gallons per day.
Alternative onsite sewage system (AOSS)	A treatment works that is not a conventional onsite sewage system and does not result in a point source discharge.
Approved method of the disposal of sewage	Water carriage disposal of sewage to an approved public or private sewage treatment system; water carriage disposal of sewage to an approved onsite sewage treatment system; or non-water carriage disposal of human excrement only to an approved pit privy, portable toilet, or other approved privy facility.
Conventional onsite sewage system (COSS)	A treatment works consisting of one or more septic tanks with gravity, pumped, or siphoned conveyance to a gravity distributed subsurface drainfield.
County	Clarke County, Virginia.
Cr horizon	Weathered or soft bedrock and is used to indicate root restrictive layers of bedrock.
Drainage way	The concave portion of the landscape in which surface water or rain water runoff gathers intermittently to flow to a lower elevation.
Electrical Resistivity tests Investigation (ERI)	A test used to determine if there are voids or other anomalies located beneath the proposed soil treatment area.
Enhanced flow distribution	A pumping system designed to have a minimum capacity of 36 gallons per minute at system head per 1200 linear feet of percolation piping.
Floodplain	Any land area susceptible to being inundated by water from any source.
Flood Plain Overlay District	Lands zoned Flood Plain (FP) Overlay District as described in the Clarke County Zoning Ordinance (County Code Chapter 200), Section 4.2.1.
Floodplain, Ten-Year	The floodplain that is at or below the ten-year flood elevation, that is, the area which has a minimum statistical probability of one in ten of being flooded in any given year. The ten-year floodplain shall be regulated as delineated in the Clarke County Floodplain Study prepared by Dewberry and Davis (September 1, 1997).
Geotechnical Engineer/Engineering Geologist" (GE/EG)	A Virginia Certified Professional Engineer specializing in geotechnical engineering or a Virginia Certified Professional Geologist specializing in

	geotechnical engineering geology, either with a minimum of 5-years experience.
Health Department	The Virginia Department of Health (VDH) and its authorized employees and agents.
Inspection	The surveillance procedures as used by the Health Department to determine compliance with the provisions of this chapter and State regulations.
Limiting Feature	A feature of the soil that limits or intercepts the vertical movement of water, including seasonal, perched, or permanent water table, soil horizons having an estimated or measured percolation rate greater than 120 minutes per inch, soils having a high shrink-swell potential, fragipans or other pans, soil restrictions and impervious strata, soil horizons containing greater than 75% (by volume) coarse fragments, and pervious or impervious bedrock. The Soil Survey of Clarke County, Virginia, 1982 shall be consulted for soil characteristic information such as soil type, permeability, and high shrink-swell potential.
Lithic Contact	The boundary between soil and underlying bedrock that is sufficiently coherent when moist to make hand digging impractical. Cracks that can be penetrated by roots must be > 4 inches apart
Lithic rock	The partially weathered to unweathered rock material which cannot be bored using a standard, hand-operated three and one-quarter inch barrel auger and sixteen-inch cross handle, or upon which refusal is encountered when using a backhoe.
Losing Stream	A perennial or intermittent stream which loses flow volume into its bed due to the presence of sub-channel (hyporheic) solution cavities or conduits.
Natural outlet	Any outlet into a watercourse, pond, ditch, lake or other body of surface or ground water. Open throat sinkholes, swallets, and losing streams are considered natural outlets into the groundwater.
Onsite Sewage Treatment System	A complete system for the collection, treatment and disposal of sewage constructed on the property it serves or by easement on another parcel. This includes conventional, alternative and alternative discharging systems.
Onsite soil evaluator (OSE)	A person licensed or certified under Chapter 23 (§ 54.1- 2300 et seq.) of Title 54.1 of the Code of Virginia.
Paralithic rock	Weathered rock material that may be found above lithic rock and below the natural soil.
Parapet	The discernable outer edge or perimeter of a sinkhole
Percolation test	A standardized water test used to determine the rate of water absorption by soil.
Pit privy	A pit for receiving non-water carriage of human waste, over which is placed a privy house with seats.

	T
Point source discharge	Any discernible, confined, and discrete conveyance including any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel, or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture or agricultural storm water run-off.
Portable Toilet	A manufactured, portable structure maintained by a licensed operator containing chemicals to neutralize odors, and made specifically for the use of waste disposal.
Professional Engineer (PE)	A person licensed or certified under Chapter 4 (§ 54.1-400 et seq.) as a professional engineer.
Restrictive strata	Soil or soil materials with an estimated or measured percolation rate in excess of 120 minutes per inch, including fragipans or other pans, lithic rock, paralithic rock and Cr horizons.
Sanitary sewer or public sewer	A carriage system specifically for transporting sewage from houses and commercial buildings through pipes to a public sewage treatment plant.
Seasonal water table	The minimum depth to seasonal water table. As used herein, "seasonal water table" means that portion of the soil profile where a color change has occurred in the soil as a result of saturated soil conditions or where soil concretions have formed. Typical colors are gray iron depletions, solid gray or black masses or concretions, or other low chroma redoximorphic depletions as described in the Munsell soil color charts. The depth in the soil at which these conditions first occur is termed "seasonal water table".
Septage	The mat of grease and scum on the surface of septic tanks, the accumulated sludge at the bottom of tanks and the sewage present at the time of pumping.
Septic tank	A settling tank in which part of the heavy solids are settled and the organic solids decompose by anaerobic bacterial action.
Sewage	Human excrement and the liquid wastes derived from dwellings, business establishments, institutions and other structures or places used for human habitation, employment or congregation, exclusive of those wastes derived from industrial processes.
Sinkhole	A basin- or funnel-shaped hollow or depression in limestone, dolostone or other soluble bedrock, ranging in diameter from less than a a few feet up to a several hundred feet and in depth from a few to several hundred feet. Some sinkholes are gentle grassy hollows or depressions; others are rocky cliff-bounded basins. A distinction may be made by direct solution of the limestone surface zone (solution sinkholes), and those formed by collapse over a cave (collapse sinkholes), but it is generally not possible to establish the origin of individual examples.

Sinking	A perennial or intermittent stream whose bed and bank disappear		
Stream/Swallet	entirely underground, usually through an open throat sinkhole or cave entrance.		
Site and Soil Verification	A full level 2 review prior to submittal of the application for a new sewage onsite system application. A Level 2 review (field check or quality assurance check) is a detailed onsite evaluation of the site conditions.		
Slope	The incline surface of a hill, mountain, etc., or any part of the surface of the earth or the angle at which such surfaces deviate from the horizontal, commonly expressed in percent.		
Soil/site evaluation	A systematic approach to evaluation of soil conditions by a Commonwealth of Virginia Department of Professional and Occupational Regulation (DPOR) licensed onsite soil evaluator.		
Soil absorption area or soil absorption system	A physical location in the naturally occurring soil medium where final treatment and dispersal of effluent occurs.		
Spring	A natural issue of water from the earth or a rock formation or fracture onto the land or into a body of water via defined channel, the place of issuance being relatively restricted in size; or		
	<ol> <li>shown as a spring on the USGS 71/2-Inch Quadrangle Map (incomplete) or, Virginia Division of Mineral Resources Publication 102, Map of Hydrogeologic Components for Clarke County, Virginia Plate 2 (incomplete); or</li> </ol>		
	<ol> <li>identified as a spring in the USGS Water-Resources Investigations Report 90-413, Ground-Water Hydrology and Quality in the Valley and Ridge and Blue Ridge Physiographic Provinces of Clarke County, Virginia; or</li> </ol>		
	3) which is currently used as a domestic drinking water source, but is not a well; or,		
	4) which is currently used as a source of water for watering animals, but is not a pond or stream; or,		
	5) which feeds a pond or lake less than 500 feet from where the spring issues; or,		
	6) which has been designated as a significant hydrologic feature by the Clarke County Board of Supervisors prior to the filing of an application for an on-site waste disposal system (a list of such designated features is on file with the Clarke County Planning Department); or		
	7) which by right may be used as a source of water by an adjoining property owner; or		
	8) which has manmade features indicating past or present use as a water supply.		

Spring Conservation Overlay District	Lands zoned Spring Conservation (SC) Overlay District as described in the Clarke County Zoning Ordinance (County Code Chapter 200), Section 4.2.2.
Standard disinfection	A disinfection process that results in a fecal coliform concentration of less than or equal to 200 colonies/100 ml.
Streams, intermittent or perennial	Any stream that is depicted as intermittent or perennial on the most recent U.S. Geological Survey 7½ minute topographic quadrangle (scale 1:24,000). A millrace or other such manmade flowing surface water shall be considered an intermittent stream. The Shenandoah River and Opequon Creek shall be considered perennial streams.
Sullage	Waste from household, sinks, showers and baths but not toilets.
Time dose distribution	A pumping system designed to dose effluent evenly throughout a given time period.
Treatment level 2 effluent or TL-2 effluent	Secondary effluent that has been treated to produce five-day biochemical oxygen demand BOD5 and total suspended solids TSS concentrations equal to or less than 30 mg/l each.
Treatment level 3 effluent or TL-3 effluent	Effluent that has been treated to produce BOD5 and TSS concentrations equal to or less than 10 mg/l each.
Vault privy	A watertight chamber for receiving non-water carriage of human waste, over which is placed a privy house with seats.
Virginia pollutant discharge elimination system permit VPDES	A permit issued by the State Water Control Board SWCB under the authority of the federal National Pollutant Discharge Elimination System NPDES program.

#### §143-3. Approved method of sewage disposal required

- A. No person shall use or occupy, or rent or lease for use or occupancy, any house, trailer, mobile home, whether self-propelled or not, warehouse, public or private building or other structure or gathering place in which there is human habitation, employment or congregation, until such house, trailer, mobile home, warehouse, public or private building or other structure or gathering place is supplied with an adequate, approved method for the disposal of sewage as provided for in this chapter or by sanitary sewer.
- B. Following the effective date of this chapter, no person shall construct a new dwelling unit unless and until it can be furnished with minimum sanitary facilities to include a toilet, hand lavatory, tub and/or shower and kitchen sink, inasmuch as these minimum facilities are necessary to proper sanitation. All such fixtures shall be supplied with hot and cold running water, with the exception of the flush toilet. In new units intended for purposes other than use as dwelling units where tubs and/or showers are not necessary for sanitation, minimum facilities shall consist of at least a toilet and hand lavatory with hot and cold running water.
- C. Alternative discharging sewage systems are not permitted.
- D. Mass drainfields are not permitted.

§ 143-4. Permit for installation. It shall be unlawful for any person to install or have installed in the county an onsite sewage system without first obtaining a permit from the Health Department.

- A. Education Requirement Prior to issuance of an operation permit for an Onsite Sewage System, the applicant shall be required to review educational material describing the operation and maintenance requirements for such system and demonstrate a basic understanding of the requirements by completing a short questionnaire provided by the Health Department.
- B. Conditional permits shall not be issued unless specifically requested by the Health Department and only if approved by the Board of Septic & Well Appeals.

### § 143-5 License requirements for installers.

- A. License. No person shall install, repair or contract to install or repair individual onsite sewage treatment systems or parts thereof without first obtaining a license therefor from the DPOR.
- B. Sewage Handling Permit. No person shall engage in the business of cleaning septic tanks, settling tanks and/or vaults designed to hold or retain solids and/or liquids in conjunction with any sewage disposal system, by whatever name called, without first obtaining a sewage handling permit from the Health Department.
- C. Disposition of sludge. It shall be unlawful for any person to dispose of the sludge and other material removed from septic tanks except by depositing it into a sewage treatment plant approved for such disposal.

# §143-6 Inspection of existing systems

The Health Department shall inspect all existing system component replacements. Existing components include building sewers, distribution boxes, conveyance lines and header pipes. Contractors replacing existing system components shall submit for a County only permit detailing the changes to the existing system for inspection, review and approval or denial by the Health Department.

In addition, the Health Department may inspect the entire system of sewage treatment maintained at all premises in the County for the purpose of determining if such is being operated and maintained in a sanitary manner. Such inspection shall be done at reasonable times and, whenever practical, in the company of the owner or occupant of the premises.

The Health Department shall make such inspections as may be deemed necessary during the construction of any sewage treatment system installed in the County to determine compliance with this chapter and State Board of Health regulations. No person shall use, allow to be used or cause to be used, any system until after the Health Department has inspected and approved the same in writing. No part of any system shall be covered until it is inspected and approved by the Health Department, and any such part which has been covered prior to inspection shall be uncovered for inspection upon order of the Health Department. In extraordinary circumstances, the Health Department may approve system installations when reasonable professional judgment indicates a revisit is not practical or feasible or an inspection has been conducted by an onsite soil evaluator or professional engineer.

#### § 143-7 Responsibility of owner of system.

No owner, tenant or lessee of any premises properly supplied with an approved method of disposal of sewage shall misuse or neglect such a system or any part thereof so as to cause it to cease functioning as designed in a sanitary manner. The issuance of a permit, subsequent installation and acceptance of the onsite sewage treatment system upon inspection by the Health Department does not denote or imply any guarantee of operation of such system, and it shall be the responsibility of the owner, or any subsequent owner of the system, to maintain, repair or replace any system which has ceased to function as designed in a sanitary manner. The system shall be maintained and operated by the property owner to conform to the requirements of the State Board of Health.

### § 143-8 Inspection and approval of design and location (new systems).

The Health Department, OSE, and/or PE shall determine whether or not the land available for the installation of an onsite sewage treatment system is adequate and satisfactory as to size, topography, characteristics of the soil, and the nature and location of the water supply. The Health Department, OSE, and/or PE shall be responsible for approving the system design and capacity and the location of the septic tank. The Health Department shall conduct a "Site and Soil Verification" of all proposed onsite sewage treatment system sites prior to submittal of an application.

### § 143-9 Soil evaluation criteria; field testing.

Minimal soil evaluation criteria for suitability of an onsite sewage system are established in this ordinance and the current Sewage Handling and Disposal Regulations, Virginia Department of Health (VDH), as amended. Backhoes are required for Health Department soil/site evaluations and verifications of private sector submitted soil/site evaluations unless waived by the Health Department. Soil characteristics shall be evaluated by the Health Department or by an OSE and/or PE and reviewed by the Health Department by "Site and Soils Verification".

- A. Closure of Onsite Inspection Pits. Any property owner causing or permitting inspection pits to be excavated for the purpose of determining soil suitability for the installation of a septic system shall have the pits filled within thirty days of final determination of suitability of the site for installation of a system. "Final determination" shall be defined as the latter of the following: the date of determination of suitability or unsuitability by the Health Department; the date of a determination of suitability by a licensed Onsite Soil Evaluator, or, the date of any decision by any appellate board or court having review jurisdiction.
- B. The Health Department, OSE, or PE and excavation contractors providing service relating to the investigation of suitability of any site for the installation of an onsite sewage system shall inform property owners of this requirement of the Clarke County Code. Failure of any of the above to so notify the property owner shall not be a defense against non-compliance.

# § 143-10 Determining suitability of soil/sites for onsite sewage treatment systems

A permit for construction of an onsite sewage treatment system on an individual lot or property shall be issued after completion of a satisfactory evaluation that indicates that such a system can be installed and is expected to perform in a sanitary manner so as not to create a health hazard.

A. Evaluation. Soil evaluation reports submitted for onsite sewage treatment system approval shall

contain detailed soil/site investigations, as described in subsection D. hereof. Evaluations shall indicate whether or not the soils meet the criteria specified herein for the installation of the type of on-site sewage treatment system proposed. In addition to information gathered during the soils and geotechnical investigation, the topography, available area, proximity to ground and drinking water supplies, proximity to bodies of water, rates of water absorption by the soil horizon proposed for use, or a combination of any of the above, shall also be considered in such evaluation. If absorption rate problems are suspected, percolation tests or other infiltration tests may be required, but their results shall not be presumptive, prima-facie or conclusive evidence as to the suitability for effluent absorption. Soil reports shall be field reviewed by the Health Department unless administratively denied or deemed approved.

- B. Site Sketch and Structure Identification. A sketch, prepared by the applicant, is to accompany all applications for permits to construct on-site sewage treatment systems and must show accurately:
  - 1. The dimensions of the property.
  - 2. Proposed and/or existing structures and driveways.
  - 3. Underground utilities.
  - 4. Adjacent sewage treatment systems.
  - 5. Bodies of water.
  - 6. Drainageways and floodplains.
  - 7. Wells and springs within a 200-foot radius of the edge of the proposed onsite sewage treatment system, and springs within 500' if at a lower elevation than a proposed onsite sewage treatment system in Karst areas.
  - 8. Any surface karst features including sinkholes, cave entrances, losing streams or swallets, or any place where surface water is preferentially being absorbed into the subsurface at a higher rate than in the surrounding terrain.

### C. Soil Profiles.

- 1. Depth of profile hole. The minimum depth of the profile hole shall be five feet, or deep enough to verify all stand offs unless prevented or made unnecessary by some physical feature of the soil, such as redoximorphic features, rock or when a potential horizon is found at a lesser depth. When a potential soil horizon is considered for use, the soil evaluation shall be extended below the soil horizon, with potential for use, to ensure that there is no interference with seasonal high water tables, lithic rock, paralithic rock or other impervious strata within the vertical offset limitation.
- 2. Number and location of profile holes. A minimum of five holes is necessary to determine the design requirements of an area for the placement of any soil absorption area. Holes shall be evenly placed to bound the area under consideration with one hole installed in the center. If more than one area is required in which to install the soil absorption area, each area shall be evaluated with at least three profile holes. The actual area and number of profile holes necessary shall be determined on a case-by-case basis.
- D. Requirements for a detailed soil/site evaluation. Detailed soil-site evaluation reports generated for any proposed onsite sewage treatment system are required by and are to be submitted to the Health Department. A detailed investigation may also be required by the Health Director for specialized land use applications such as solid waste operations, composting facilities or other

similar uses. The detailed soil/site evaluation report should include the following, where appropriate, unless determined by the Health Director, at the request of the developer, to be inapplicable based upon sound engineering principals:

- 1. Results of field investigation.
  - a. A map, drawn to 1:2,400 scale (1 inch = 200 feet) and larger, as requested on a sheet twenty-four inches by thirty-six inches. Where small tracts are involved, an eight by eleven-inch sheet may be acceptable, provided it complies with all other requirements set forth herein.
  - b. Existing water supplies within 100 feet of the property and 200 feet of sewage treatment systems on the property.
  - c. The location of all backhoe pits. Test holes are to be numbered and located dimensionally, including surface elevations.
  - d. The location of all numbered proposed on-site soil absorption areas, if applicable. All soil absorption areas must be shown on contour and delineated by five pits.
  - e. The following items as they relate to the proposal, if applicable:
    - 1. The landscape type and position, the slope, topography and the surface drainage.
    - 2. The soil morphology, including the texture, color, structure, consistency, depth, lithologic discontinuities, boundaries, etc.
    - 3. The permeability, internal drainage and perched water tables.
    - 4. The parent material and associated problems.
    - 5. Restrictive strata.
  - f. The soil evaluation form.
- 2. The following items shall be required in the report when soil absorption areas are proposed:
  - a. Depth of installation, type of system, relative suitability and modifications.
  - b. Recommendations and conclusions for repairing existing malfunctioning onsite sewage treatment systems.
  - c. Potential impacts on ground and surface water.
- 3. Field logs. Soil profile descriptions taken from backhoe pits shall include:
  - a. The profile hole numbers.
  - b. The depth, thickness and description of each horizon, including paralithic and lithic contacts encountered.
  - c. Locations of all samples taken and analyses to be conducted on each sample.
  - d. The depth to perched water and/or the ground water table if observed (or if indicated by soil color patterns).
  - e. The name and title of the person responsible for the description and sampling.

#### § 143-11. System siting

A. For Lots zoned Spring Conservation Overlay District (SC) as described in Section 4.2.2 of the Clarke County Zoning Ordinance:

- 1. No new onsite sewage disposal systems shall be located within 1,000 feet of Prospect Hill Spring.
- 2. Onsite sewage treatment systems shall be an alternative onsite sewage system (AOSS) designed to produce a minimum of treatment level 2 (TL-2) effluent, with soil absorption areas sized at 1.5 times the normal size.
- 3. Alternative systems not utilizing pressurized dispersal methods must provide unsaturated soil conditions (enhanced flow) within the soil treatment area.
- 4. A 100% reserve area shall be provided for each system.
- 5. Installation of any onsite sewage treatment system shall be inspected and approved by the County's designated engineer or representative.
- B. In all cases, the soil and site evaluation shall determine if a Conventional Onsite Sewage System (COSS) can be designed to serve the proposed use. If so, the COSS shall be proposed, unless explicitly directed otherwise such as in the Spring Conservation Overlay District. If a COSS cannot be designed for the site, a statement must accompany the soil evaluation, signed by a licensed Onsite Soil Evaluator that states the site restrictions that restrict the site to an AOSS.
- C. Soil restrictions for Onsite Sewage Treatment Systems.

  The following Table 1 details the soil restrictions for soil absorption system installation. In all cases, systems shall be installed below the ground surface in naturally occurring in-situ (undisturbed) soils as indicated:

Table 1.

		sidewalls (horizontal)	bottom (vertical)
Distance to rock/restrictive strata –			
Non-karst (COSS)		24"	24"
Distance to rock/restrictive strata –			
Karst (COSS)		24"	24"
AOSS	TL-2	18"	18"
AOSS	TL-3	18"	18"
Distance to seasonal water table (COSS)			20"
AOSS	TL-2		18"
AOSS	TL-3		18"

- 1. Alternative Onsite Sewage Systems must be installed a minimum depth of 3" below the ground surface in naturally occurring, undisturbed in-situ soil.
- 2. Conventional Onsite Sewage Systems must be installed a minimum of 18 inches below the ground surface in naturally occurring, in-situ soil.
- 3. Onsite Sewage Systems installed at less than 18" depth require at least 12 inches of soil cover in the soil treatment area.

- 4. Onsite Sewage System soil treatment areas, utilizing gravel less dispersal, shall have no reduced footprints.
- 5. Onsite Sewage Systems shall not be installed in soil horizons having "high shrink-swell potential", soils classified as "poorly drained" or having "slow permeability", or having known descriptions of pans of any type. A soil test is required to confirm the aforementioned characteristics. If the percolation rate is satisfactory, all vertical and horizontal siting requirements must also be satisfied.

#### D. Site Restrictions

Minimum distances between components of septic systems and site features are prescribed in the current Sewage Handling and Disposal Regulations, Virginia Department of Health, as amended.

Onsite sewage treatment system components shall be prohibited or restricted on sites as described in Table 2, Minimum Separation Distances.

Table 2: Minimum Separation Distances

#### Minimum Distance From

Structure or Topographic Features	Soil Treatment Area (feet)	Septic Tanks or Vault Privies (feet)	All Other Parts of the Septic System (feet)
Slopes greater than 25%	Not permitted	N/A	N/A
Flood Plain (Ten-Year)	Not permitted	Not permitted	Not permitted
Free flowing streams, natural lakes or impounded waters (measured from edge)	100	100	50
Intermittent stream	50	50	50
Drainageways (measured from low point)	50	50	N/A
Wells	100	100	50
Surface Rock Outcrops	Karst: 10'	Karst: 10'	N/A
	Non-karst: 2'	Non-karst: 2'	N/A
Parapet (visually discernible edge) of sinkholes and cave entrances	100	100	50
Springs at a lower	Karst: 500	Karst: 500	Karst: 100
elevation than the septic system	Non-karst: 200*	Non-karst: 200*	Non-karst: 100
Springs at a higher	Karst: 200	Karst: 200	Karst: 100
elevation than the septic system	Non-karst: 100	Non-karst: 100	Non- karst:100
Utility Easement (edge of) Upslope Downslope	10 25	10 25	10 10

N/A = Not applicable.

NOTE: In the event that there is disagreement between an OSE and/or PE and the Health Department regarding whether a natural outflow of water from an underground supply to the ground surface is a spring or a seep, then it shall be determined by a licensed professional geologist or hydrologist.

<sup>\*</sup>Refer to Item (6) below.

- 1. The distance from the structure served by the onsite sewage treatment system to the nearest point of the soil treatment area shall not be greater than 500 feet.
- 2. Driveways and parking areas. Driveways and parking areas shall be a minimum of 10 feet from onsite sewage treatment systems except for sewer and conveyance lines crossing the area and soil absorption areas designed to be placed under paved surfaces.
- 3. Minimum Size. For onsite sewage treatment systems using trench dispersal, the size of the soil absorption area based on the square footage of the trench bottoms shall consist of a minimum of 600 square feet. Drip disposal systems or any systems installed shallower than 6" shall have a minimum square footage of 1200 sq. ft.
- 4. Reserve area. An onsite sewage system reserve area with a capacity at least equal to that of the primary area (100%) shall be provided in accordance with the provisions of this article regardless of parcel recordation date. If existing lots must be merged to create a satisfactory building lot, then a 100% reserve area is required.
- 5. Replacement and repairs of existing approved onsite sewage treatment systems, may encroach on minimum separation distances for site features listed in Table 2, so long as they are no closer to those features than the existing onsite sewage treatment system and so long as the encroachment is not likely to cause a significant threat to public health or the environment as determined by the Health Department.
- 6. Setback distance exceptions for onsite sewage disposal areas in non-karst soil areas for lots of record in existence prior to November 17, 1987, the setback distance from a spring at a lower elevation than a proposed onsite sewage system may be reduced below 200' provided:
  - a. The spring location, the proposed onsite sewage disposal area, and the impact area between the two features shall be identified as Non-Karst soil areas.
  - b. The spring is not used as a domestic drinking water supply or identified as a developed spring by the Virginia Department of Health.
  - c. The minimum allowable setback is 100 feet.
  - d. The proposed onsite sewage disposal system disperses at least a "TL-3 effluent" standard as defined by the Virginia Department of Health Regulations for Alternative Onsite Sewage Systems as effluent that has been treated to produce BOD<sub>5</sub> and TSS concentrations equal to or less than 10 mg/l each.
  - e. A detailed public health and safety narrative report shall be provided by a licensed Onsite Soil Evaluator. This report shall include:
    - i. Explanation of the site conditions and design of the septic system
    - ii. Assurance that all conditions noted in this section are satisfied.
    - iii. An affidavit stating that an onsite sewage disposal system is unable to be located on the property meeting this requirement and that the location of the proposed onsite sewage system meets this

requirement to the greatest extent possible being located as far from the spring as is feasible.

- iv. A listing of recommendations to mitigate any potential degradation of and effect on the groundwater.
- v. The proposed onsite sewage disposal system meets all State and County requirements.
- E. Explosives or pneumatic hammers. The use of explosives or pneumatic hammers (other than hand-held pneumatic hammers) shall not be permitted for the excavation associated with septic tanks or onsite sewage treatment systems or within 50 feet of any soil treatment areas.
- F. Easements. Easements for off-site installation of onsite sewage systems are not permitted:
  - 1. Except for residences constructed prior to December 15, 1987.
  - 2. Except for commercial uses:
    - a. Located in a commercial zoning district.
  - 3. Provided that such off-site onsite sewage systems for such qualifying commercial uses:
    - a. Do not constitute a mass drain field (a sewage disposal system or systems which will discharge effluent to a single absorption area or multiple absorption areas with or without combined flows, such that the loading rate applied to any acre, as determined by the department, exceeds 1,200 gallons per day.
    - b. Have a one-hundred-percent reserve area.
    - c. Have a maintenance program which includes pumping out of the septic tank every five years at a minimum.
    - d. Need not be located in a commercial zoning district.
    - e. Shall be shown on an approved site plan and placed under an easement, recorded in the land records of Clarke County within six months of site plan approval. Such easement shall show the land area encompassing the septic facilities, provide means of access and state the party responsible for the maintenance of the septic system.
    - f. Shall be abandoned if public sewer service becomes available to the property being served by the off-site septic system easement. Hookup to the public sewer system is required and the requirement for an easement shall terminate.

#### § 143-12 Subsurface Investigations

This section is to establish review procedures and performance standards for non-invasive subsurface investigations designed to identify the potential for voids beneath primary and reserve onsite sewage system soil treatment areas so as to avoid locating in areas where subsidence may occur.

# Site Review

Whenever an application is filed for an onsite sewage treatment system permit or certification letter with the Health Department, except for emergency repair applications as determined by the Health Department, in any region underlain with limestone, dolomite, calcareous shale, or marble, specifically described as areas containing soils derived from these materials, which include soil types (4, 5B, 5C, 10, 15B, 15C, 17B, 18, 23, 24, 30B, 31B, 32B, 33B, 35B, 35C, 36B, 36C, 37B, 38B, 38C, 38D2, 39B, 39C, 39D2, 43C, 44B, 45B, 46B, 47B, 47C, 48B, 51B, 55D, 56, 57C2, and 57D2, as identified in the Clarke County Soil Survey, 1982), the applicant will hire a Geotechnical Engineer (GE) to conduct Electrical Resistivity Investigation (ERI) to determine if voids or other anomalies are located beneath the proposed soil treatment area. NOTE: If the area evaluated is shown as the soil types listed above, however based on field conditions observed by the OSE and/or PE it is determined to be a non-karst soils area, then the Health Department can be asked to review the site for the final determination. In the event that there is disagreement between an OSE and/or PE and the Health Department regarding karst or non-karst soils, then it shall be determined by a licensed professional geologist.

### **ERI Testing**

The ERI testing shall be performed by an individual with a 4-year degree in geology or engineering with a minimum of 2-years' experience conducting resistivity testing;

Testing shall utilize dipole-dipole resistivity surveying array;

Testing shall consist of a minimum of two lines laid out through the soil treatment area (two lines each primary and reserve area, unless contiguous), perpendicularly to the strike of the bedrock, and extending a minimum distance beyond the drain field area of 60 feet so as to provide a minimum depth of penetration of 20 feet at the edge of the field, and allow for movement of the field should irregularities be identified;

Testing shall include use of a minimum of 24 electrodes per 100 feet of line, so as to provide a minimum of 200 soundings;

Testing shall provide minimum reading depth of 40 feet;

Electrode contact resistance shall be less than 5000 ohms, if not a salt-water mix shall be poured over the soil where electrodes are placed;

Lines shall be clearly marked at each end with stakes or other identifiable markers;

The results of the ERI testing shall be evaluated and reported upon by an individual with a 4 year degree in geology or geotechnical engineering and a masters degree in geophysical studies or equivalent. (Equivalent shall consists of not less than 5 years experience in interpreting the results of geophysical investigations, in particular ERI.)

Results of test shall be included in a report which includes, in part, the following, to be provided to the county Natural Resource Planner:

a. summary of methods,

- b. resistivity described in Ohm-meters,
- c. electrode spacing,
- d. directional orientation,
- e. plan maps describing the line layout and in relation to onsite system soil treatment areas
- f. color image profiles detailing the results and identifying any hazards, images shall maintain a consistently applied color scale ranging from blue-green-yellow-red, and indicate the location of the soil treatment area relative to the profile. The Ohm-m scale shall range from 0 to 4000 to provide consistency between consultants. Hazards shall be labeled on the profile so as to indicate the type of irregularity as described below,
- g. irregularities in the profile shall include pinnacle/cutter topography, float rocks, soft zones, voids, mud-filled voids, extreme fracturing, and any other such anomaly,
- h. the amount of overburden,
- i. surface elevations shall be integrated with ER profiles,
- j. discuss the significance of the geologic structure,
- k. quantify qualitative terms such as "low", "moderate" or "high" risk
- I. implications of findings, i.e. should drain fields be located as proposed, and if so why, and
- m. discuss the possible benefits if any of relocating a soil treatment area;
- If the profiles show anomalies, and the ERI testing engineer/geologist recommends use of the site, then air track drilling is recommended to explore rock discontinuities or anomalies. In questionable soil (like cutters) conventional test borings are preferable. In either case the drilling/test shall be conducted to determine the extent and significance of the anomaly. The location of drilling or borings shall be documented and the findings of each described in detail, including a summary of the implications of the feature, if the site continues to be recommended for use, and why the feature is inconsequential;
- If evidence of voids is documented beneath the proposed soil treatment area, or if anomalies encompass 20% or more of the proposed site, or the implications of findings recommend avoidance of the site, then the soil treatment area shall be relocated and the new area evaluated as described above; and

Subdivision plats and onsite sewage system permits shall include the following statement:

"Subsurface investigations have been conducted for the onsite sewage system sites on the parcels identified herein. Reports detailing the findings are available at the Clarke County Planning Department."

#### § 143-13 Design and installation.

- A. Removal of vegetation. Vegetation, such as maples, willows and other plant species with extremely hydrophilic (water loving) root systems, shall be removed at least ten feet from the actual absorption areas. All trees should be removed from the absorption area.
- B. Onsite sewage systems, that provide unsaturated soil conditions (enhanced flow) within the soil treatment area shall be required in the following soils:

- 1. Soils that have an estimated or measured percolation rate of 16 or less minutes per inch.
- 2. Soils that have an estimated or measured percolation rate of 91 to 120 minutes per inch.
- 3. Soil horizons containing between 50% and 75% (by volume) coarse fragments

### § 143-14 Reutilization of Existing system.

This section is to establish review procedures and performance standards for:

- The reutilization of existing on-site sewage disposal systems in the event of replacement of a structure having been lost by fire or other circumstances, or
- When the applicant desires to substantially modify an existing structure, which is defined as:
  - doubling the square footage of the structure; or
  - the construction value (as determined by the Building Department) is more than the assessed value (Commissioner of the Revenue), or
- When the applicant proposes a change of use, or
- When an existing system's use has been discontinued or utilized under design capacity.

A County official will determine the need for and must request an existing system review by the Health Department. Reviews are generally requested by the Building Department when there is a potential for well or septic encroachments.

In order to be considered for reutilization the following criteria must be met, as determined by the Health Department:

- The system must have no known history of failure or malfunction either since installation or previously authorized repair or replacement.
- Adequate information about the system must exist or be determined in order to make a judgment as to its adequacy for the proposed use. This information may include, but is not limited to, the following:
  - o system location, landscape, setbacks, etc.
  - o tank size and integrity
  - o size of the absorption system
  - o construction and materials
  - o design plan
- The system shall be of a nature previously or presently approved by the Health Department.
- The owner shall supply evidence that the septic tank has been pumped within the last 5 years.

- The structure that the system is proposed to serve must have been in recent and continuous service, as determined by the Health Department. Any structure not in use for the previous two years must meet current standards for a new system.
- The proposed effluent quantity and strength shall not exceed the amount previously applied to the system unless it can be established the system was utilized below design capacity. In no case shall the original design capacity be exceeded.
- A reserve area shall be provided as described in Section 143-11-D-4.

### **System Evaluation**

In cases where Health Department records are insufficient, the following procedures shall be completed in order to determine the adequacy of the system:

- If needed, hold a preliminary fact-finding meeting with the applicant to discuss status of the existing system and requirements for completing a soil evaluation report, as-built drawings, and an inspection report.
- Conduct a physical walkover of the site to insure that there is no evidence of ponding on the ground surface. Also the perimeters of the site shall be checked to ensure that there are no discharges of sewage or gray water.
- Put dye in suspicious systems (possible straight pipes, wet spots, etc.) and conduct follow up visits as needed to ensure proper system operation.
- Note any structures, driveways, trees, etc. built over system components and make recommendations for removal as needed.
- Confirm the footprint of any new proposed addition conforms with current separation distances to sewage disposal system(s) and well(s).
- Any proposal for an increase in waste-loading rate more than the design will require a standard site and soil evaluation to pursue a septic system construction permit for expansion.
- At a minimum, all distribution boxes, both lids of the septic tank(s), and the end of the last line shall be uncovered by the owner for further evaluation.
- Check number of outlet ports and attempt to estimate size.

#### Reporting

#### The Health Department shall:

- Forward a letter to the County official requesting the evaluation that describes the system and any recommendations.
- A disclaimer shall be attached to the report stating, "This report is only intended to address the above referenced request. This report is not intended for use as part of a real estate transfer or any other unauthorized use. There is no implied guarantee of future system performance based on this report. In the event of sewage disposal malfunction, the owner will be responsible for any repairs or other actions deemed necessary to correct the situation."

#### § 143-15. Appeals & variances.

# A. Board of Septic and Well Appeals

- 1. Appeals of administrative interpretations of this article, and applications for variances, shall be heard by a Board of Septic and Well Appeals ("The Board").
- 2. The Board of Septic and Well Appeals shall consist of three members:
  - a. a member of the Board of Supervisors, , with any other member of the Board designated as his/her alternate.
  - b. a member of the of Planning Commission with any other member of the Planning Commission designated as his/her alternate, and
  - c. a member of the public, who is a resident of the county with a member of the Planning Commission designated as his/her alternate.

All members shall be appointed by the Board of Supervisors at their first regular meeting of each year.

- 3. The Board shall have the following powers and duties:
  - a. To hear and decide appeals from any order, requirement, decision or determination made by the Clarke County Health Department in the administration or enforcement of this article.
  - b. To hear and decide applications for variances in accordance with the provisions of this section.

#### B. Appeals.

- 1. Any appeal shall be filed within 30 days of the issuance date of the order, requirement, decision, or determination .
- 2. Any person seeking an appeal shall apply in writing to the Board. Such application shall include:
  - a. A citation to the order, decision, determination or regulation to which an appeal of interpretation or application is requested;
  - b. Any relevant analytical results, including results of tests conducted pursuant to the requirements of this article;
  - c. Other information, if any, deemed pertinent by the applicant; and
  - d. Such other information as the Board may require.
- 3. The Board shall act on any appeal request within 60 calendar days from the Board's first review.
- 4. All appeals shall be consistent with the intent of this article. The Board may attach reasonable conditions consistent with the intent of this article in granting appeals.
- 5. No appeal may be heard except after notice and hearing as required by § 15.2-2204, Code of Virginia and in accordance with the requirements of Section 10-E of the Clarke County Zoning Ordinance.

- 6. An appeal of a decision of the Board shall be made within 30 days to the Board of Supervisors. Any appeal of the decision of the Board of Supervisors shall be made within 30 days to the Circuit Court of Clarke County.
  - 7. The concurring vote of two members shall be necessary to reverse any order, requirement, decision, or determination of an administrative officer, or to decide in favor of the applicant on any matter upon which the Board is required to pass under this Ordinance, or to effect any variance from the Ordinance.

#### C. Variances.

- (1) Variance criteria.
  - a. In order to be eligible for a variance, the system for which the variance is requested serves or is planned to serve one of the following:
    - (i) An existing single family dwelling or structure serving an existing business.
    - (ii) An existing single family dwelling or structure serving an existing business that has been destroyed by circumstances beyond the control of the owner or occupant of the building within one year of the variance application.
    - (iii) A building that is eligible to be on the Virginia Landmarks Register or the National Register of Historic Places or is eligible to be a contributing property in an historic district listed in the Virginia Landmarks Register or the National Register of Historic Places.
    - (iv) The variance is requested so as to provide for septic systems or water supply systems replacing existing septic systems or water supply systems that are more consistent with the regulations of this article. An existing single family dwelling or structure serving an existing business must be located on the property with the existing septic system or water supply system.
    - (v) The entire parcel of land has been placed under a permanent conservation easement.
- (2) Variances shall be approved to alleviate a clearly demonstrable hardship approaching confiscation involving existing single family dwellings or structure serving an existing business, as distinguished from a special privilege or self-imposed (elective) convenience or option sought by the applicant.

# (3) Variance procedure:

If the proposed variance involves a request to locate a soil treatment area farther than 500 feet from the single family dwelling or structure serving an existing business, the applicant must provide an affidavit signed by the soil consultant stating that no suitable area could be found within the 500 feet radius. Attached to the affidavit shall be a written report detailing the reasons why no site could be found, including but not limited to soil test pit locations and profiles, site conditions such as topography, and/or setback restrictions.

- (a) Any person seeking a variance shall apply in writing to the Board. Such application shall be in writing and shall include:
  - (i) A citation to the order, decision, determination or regulation from which a variance is requested.

- (ii) Identification of which of the variance criteria in paragraph C.(1) applies;
- (iii) The nature of the variance requested.
- (iv) Any relevant analytical results, including results of tests conducted pursuant to the requirements of this article.
- (v) Statements or evidence why the public health and welfare as well as the groundwater resources would not be degraded if the variance were granted.
- (vi) Suggested conditions that might be imposed on the granting of a variance that would limit the detrimental impact on public health and welfare or groundwater resources.
- (vii) Other information, if any, deemed pertinent by the applicant.
- (viii) Such other information as the Board may require.
- (a) The Board of Septic And Well Appeals shall act on any variance request within 30 60 calendar days of receipt of the request
- (c) The Board may attach reasonable conditions consistent with the intent of this article in granting variances. Compliance with conditions shall be required for the life of the system for which the variance is issued, unless specified otherwise by the Board.
- (d) No variance may be granted except after notice and hearing as required by §15.2-2204, Code of Virginia. Posting and notification of adjacent property owners are waived for existing failed systems requiring emergency repairs, which alter the configuration of the existing system as determined by the county Health Department.
- (e) (e) A denial of a variance, or an appeal from the terms and conditions set forth in the variance, shall be made within 30 days to the Board of Supervisors. Any appeal of the decision of the Board of Supervisors shall be made within 30 days to the Circuit Court of Clarke County.
- (f) Each variance shall be attached to the onsite sewage disposal system permit to which it is granted and shall remain in effect so long as the permit is valid. Each variance is revoked when the permit to which it is attached is revoked.

### § 143-16. Fees.

The Board of Supervisors shall set by resolution such fees as it deems necessary and reasonable to defray the cost of permits and/or licenses, inspections and testing as are required to be issued under this article.

§ 143-17. Violations and penalties. Penalties for violation of the provisions of this article shall be as provided in Clarke County Code Chapter 1, General Provisions, Article I.

# <u>CONVERSION CHART – 2016 SEPTIC ORDINANCE TO DRAFT REVISED SEPTIC ORDINANCE</u>

<u>Note</u> – This chart depicts the general location of provisions from the 2016 Septic Ordinance as they appear in the draft revised Septic Ordinance. A more detailed listing of all changes to the 2016 Septic Ordinance is maintained by the Department of Planning.

Previous Section and Title	New Section
143-1 Permit for installation	Moved to 143-4 Permit for Installation
143-1.1 Education Requirement	Moved to 143-4-A no change
143-2, A & B Inspection and approval of design	Moved to 143-8 (existing system inspection)
and location	Added language from Loudoun 1066.16
143-2-C – AOSS fenced from livestock	Recommend deletion – not practical or enforceable
143-2-D - AOSS indemnification	Recommend deletion – not practical or enforceable
143-3 Standards for professional septic tank	Moved to new 143-5-B
cleaners	License requirements for Installers
143-3-A, B, C, D, & E	Replaced by Loudoun Section 1066.04
143-4 Disposition of Sludge	Reworded based on comments from Jerry Franklin. Moved
	to143-5-C
143-5 Violations and Penalties	Moved to 143-18 no change
143-6 Intent; state regulations; exceptions;	Intent moved to 143-1
143-6-A fragile geology	Moved to 143-1 Intent
143-6- B permits after 1987	Deleted no longer relevant
143-6-C conditional permits	Moved to 143-4-B no change
143-7. Definitions	Moved to 143-2, added definitions from Loudoun 1066.01
143.8 Soil Evaluation criteria; field testing	Moved to 143-9
	Updated certification requirements based on comments from
	J. Franklin
143-8.1 Closure of Onsite Inspection Pits	Moved to 143-9-A no change
143-8-B investigation	Moved to 143-9-B no change
143-8-C administration of ordinance	Moved to 143-1 added administered and enforced by HD
	and Zoning
143-9 System siting	Moved to 143-11
143-9-A use of COSS first then AOSS	Moved to 143-11-A

143-9-B. Soil restrictions for Onsite Sewer	Moved to 143-11-C
Systems	
143-9-B-1 AOSS installation	Moved to 143-11-B-1 changed depth req from 10" to 3"
	Deleted installation depth req. (a. & b.)
143-9-B-2 COSS 18"	143-11-C-2 no change
143-9-B-3 <18" tree cover	143-12-B-3 deleted trees not removed
143-9-4&5 min 18"& 24" soil	Replaced by table 1
143-9-B-6 10' to rock	Moved to 143-11 Table 2
143-9-B-7 gravel less dispersal	143-11-C-4 no change
143-9-B-8 high shrink-swell	143-11-C-5 no change
Site Restrictions Table 1.	Moved to 143-11-C Table 2 added note if disagreement
143-9-C. Floodplain	Moved to 143-11-C Table 2 no change
143-9-D. Replacement, repairs, expansions may	Moved to 143-12- – deleted expansions
encroach	
143-9-E. off-site Easements	Moved to 143-11-F deleted irrelevant sentences
143-9-F 400' distance to house	Moved to 143-11-C-1 changed distance to 500'
	Added 143-11-C-2 driveway setback from Loudoun 1066.12
	Added 143-11-C-3 minimum soil absorption area 1066.12
143-9-G. Resistivity	Moved to 143-12 put in its own section - Mr. Denton made
	several comments and additions
143-9-H Spring setback (2016)	Moved to 143-11-C-6 no change
143-10 Design and Installation	Moved to 143-13
	Added 143-13-A removal of vegetation from Loudoun
	1066.12
143-10-A. Soil treatment area	Moved to 143-13-B – no change
143-10-B Privies	Deleted not enforced
143-10-C. Pump & Haul	Deleted covered by state regs
143-10-D. Explosives or pneumatic hammers	Moved to 143-11-F – no change
143-10-E. Reserve area	Moved to 143-11-C-4 no change
143-10-F. Reutilization of Existing Systems	Moved to 143-14 – added definition of substantial
	modification

143-11 Appeals and variances	Moved to 143-15 – restructured, modified variance criteria to replace habitable structure with existing single family dwelling and existing business
143-12 Fees	Moved to 143-15 – no change
143-13 Violations	Moved to 143-16 – no change

B. Privies. The Health Department may shall issue permits only for portable or vault privies within the floodplain of the Shenandoah River. Portable privies in areas outside of the floodplain shall not require permits. No other type of new privy shall be permitted except in remote areas where vehicular access is unavailable. (Refer to § 143-12 Table 2 Minimum Separation Distances.)

#### 1. Portable privies.

- (a) Portable privies are allowed only for use in association with government owned facilities or for temporary activities such as construction sites, entertainment events or agricultural or forestry activities.
- (b) Within the Flood Plain District (one hundred year floodplain), portable privies: Within the Flood Plain Overlay District as described in Section 4.2.1 of the Clarke County Zoning Ordinance, portable privies:
  - [1] Require a permit from the Health Department.
  - [2] May not be located on a parcel for more than 15 consecutive days between October 1 and April 30.
  - [3] Shall be located at least two feet above the elevation of the annual floodplain.
  - [4] Shall be removed from the floodway floodplain of the Shenandoah River when flooding of the river is predicted by the National Weather Service.
  - [5] Shall submit a maintenance contract with the waste hauler, indicating that the privy will be pumped when the tank is 3/4 full, with the permit application.
- (c) Agricultural activities requiring the use of pit privies are exempt from Subsection B(1) and (2).
- 2. Vault privies are not allowed within the floodway **floodplain** of the Shenandoah River. Outside of the floodway **floodplain**, vault privies are allowed only for primitive recreational areas with intermittent use and no plumbing facilities. A maintenance contract with the waste hauler, indicating that the privy will be pumped when the tank is 3/4 full, shall be submitted with the permit application.
- 3. All non-portable privies within the floodway **floodplain** of the Shenandoah River shall be abandoned and removed by May 1, 1995. Abandonment and removal shall be accomplished by removing the structure, liming the pit and covering the pit with at least two feet of soil and otherwise complying with any applicable regulations of the State Board of Health for pit privy abandonment.

#### **MEMORANDUM**

TO: Board of Supervisors, Chris Boies

FROM: Alison Teetor

SUBJECT: Septic pumpout response summary

DATE: October 27, 2021

At the March 8<sup>th</sup> Board of Supervisors worksession, staff presented an idea to encourage voluntary septic pumpout (maintenance). The overall purpose of septic system maintenance is ensure that septic systems are functioning properly in order to protect groundwater from coliform contamination. The approach was as follows:

- 1) Staff developed educational/outreach materials for encouraging voluntary septic pumpout County wide via social media, news release
- 2) Staff contacted septic haulers to request accurate addresses on receipts and inform them of initiative
- 3) Staff identified property owners who have pumped their tanks based on 10 years of records from the Frederick County Opequon Wastewater Treatment Plant. The data was generated from receipts from Septic haulers. Anyone not on spreadsheets was sent a letter describing why it is important to pump and to call staff if they received this letter in error.
- 4) Letters were mailed in 6 phases to all non-pumpers randomly.

The following table summarizes the number and dates of sending septic pumpout letters along with an informational flyer.

Initial mailing July 12, 2021	117 letters
2nd mailing July 27, 2021	315 letters
3 <sup>rd</sup> mailing August 10, 2021	295 letters
4 <sup>th</sup> mailing August 17, 2021	317 letters
5 <sup>th</sup> mailing August 30, 2021	384 letters
Last mailing September 9, 2021	339 letters
Total of 6 mailings	1,767 letters total

Out of 1,767 letters 188 (10.6%) responses were received. Of the 188 only three were negative in the sense that they questioned where the data came from and how the County knew about the pumpouts. Staff provided the explanation that the County has a contract with Frederick County to dump septage in the Opequon Wastewater Treatment Plant that they provide spreadsheets each month from the plant with addresses provided by the haulers of those properties they have pumped. The addresses were verified over a 10 year period. Those persons not on any of the spreadsheets received letters. Many people were thankful to have received the letter, stating that they either didn't realize they needed to pump or were happy to have gotten a reminder.

#### Summary of responses

Reason for call	Count of responses	
educate		1
house vacant		6
Inspected (alternative system) new house built w/in last 10		10
years		10
Newly installed system Respondent saw no need to		4
pump		3
no existing septic system		1
pumped due to letter		7
Pumped within last 10 years		135
pumped easement newsletter		1
pumped when house was		
purchased		10
<b>Grand Total</b>		188

The original assumptions were that all Clarke septage is taken to the Opequon Treatment Plant for treatment and that the spreadsheets received monthly from the Plant accurately indicate the origin of the septage. Based on this study neither assumption is correct. As indicated in the table above 152 (81%) of respondents stated that they had their system pumped within the last 10 years. Many provided receipts to show the pumpout was completed. In addition, many more haulers were identified as collecting septage in Clarke that were not on any of the spreadsheets provided by FWSA. Staff asked the Health Department about regulations pertaining to septage disposal and found that haulers are licensed by the Virginia Department of Department of Professional and Occupational Regulation. Each septage treatment plant decides who is permitted to dispose of septage in that facility, so some of Clarke septage may be going to other treatment facilities. In addition, when depositing into the Opequon Plant, haulers submit a business/residential source form that is supposed to detail where the septage originated. In speaking with haulers, the form does not always include all addresses that are pumped, either because the form doesn't have enough space, or there are multiple tanks for one property. So the data provided by FWSA is not complete. It is difficult to estimate the percent compliance based on the responses from the mailing, but letters were mailed to roughly 51% of persons with a septic system and no pumpout record, the letters asked for a response if it was received in error, i.e. they had pumped their tank, 10% responded so potentially 41% (724) did not respond because they have not pumped their tank.

The main purpose of the initiative was to encourage septic pumpout. A second objective was to determine if a mandatory pumpout is needed and if so how best to implement the program. Initial findings indicate that a continued voluntary approach is warranted. The primary reason for this is that the County needs an accurate, accessible database in order to best implement a pumpout requirement. Currently data is available from the Health Department on an as needed basis – all file records have been scanned and can be requested by property. This data cannot be searched and therefore cannot provide any statistics on type of system, maintenance or any other information. Staff has researched more than a dozen pumpout programs and found that most Counties develop their own system for

tracking. Loudoun County and others utilize a program called online RME. Loudoun uses this to track system components, maintenance, pumpouts, and all other aspects of septic systems in Loudoun. This program is accessible to the public, Health Department, and anyone wanting to know about the septic system on a particular property. They have also linked the data to their online GIS. A database such as this is critical in order to effectively manage and understand onsite septic systems in the County. This will be particularly important if regulations governing AirBNB's are implemented.

#### Database Development

Staff initially entered all pumpout data into MUNIS. This is okay but limited in accessibility, i.e. only County personnel can access this data. The Health Department has a statewide database but that is not accessible to the public or the County staff due to HIPPA requirements. In order to determine if online RME is right for Clarke County, staff contacted the company and had a demonstration, then spoke with Health Department personnel to determine if they would be interested in utilizing the system. RME conducted a second demonstration for Mr. Jim Davis, Ms. Carter Neiswander, and Mr. Chris Boies. After that meeting staff received positive feedback and initiated populating the database with property assessment data. Ms. Carter stated she would work on entering alternative system data, which is the primary concern as these systems should be inspected annually. There is no charge to establish the database.

#### Recommendation

Support exploration of septic database development with the goal of providing additional information during the budget process.

#### **Project Narrative**

#### A. Preservation Opportunity

The Battle of Berryville occurred on September 3-4, 1864, at the opening of the Valley Campaign, when forces under Gen. Philip Sheridan (USA) and Gen. Jubal Early (CSA) met west of Berryville (map included in the other attachment forms). The Federal Advisory Commission on Civil War Sites, commissioned by Congress to identify the principal battlefields of the American Civil War and their present condition, lists the Battle of Berryville as one of the 384 most significant battles of that War. An estimated total of 11,000 men fought, with about 500 casualties, with the action occurring over about 7,000 acres mostly west of U.S. Route 340 in Clarke County, Virginia. The battle was a draw, but was the immediate precursor to the Third Battle of Winchester, the largest battle fought in the Shenandoah Valley, which occurred two weeks later on September 19 and was a victory for Union forces.

The Berryville Battlefield Study Area is located in and around the town of Berryville, in Clarke County, Virginia, at the nexus of Routes 340 and 7. Residential development continues to threaten land along the Route 7 and 340 corridors. New subdivisions exist just south and north of Berryville. The newly constructed Clarke County High School and surrounding single-family homes on the outskirts of Berryville have already destroyed an area important to the battle known as Beemer's Woods. In early September 1864, General Jubal Early sent Kershaw's division east to Berryville from Winchester. Right outside Berryville, Kershaw's division encountered General Philip Sheridan's army in Beemer's Woods. In addition, Routes 7 and 340 are integral to understanding the battlefields as troops consistently used them as avenues of approach and retreat. In the past ten years, the population within the town of Berryville and Frederick County, surrounding Winchester, have grown significantly, creating a demand for more services along these routes. The Frederick County comprehensive plan shows increases in new housing east of Winchester, threatening the western extent of the battlefield and the integrity of the Jubal Early's retreat routes. However, there are large areas of the Battlefield that have not been developed and are still in pristine condition.

The proposed project will address the above threats by identifying specific historic resources relating to the Battle of Berryville, which would be impacted by development or transportation enhancement projects. Currently, there is no recognition of Berryville Battlefield as a historic resource by Clarke County or the Town of Berryville and as such, there are no plans in place to consider impacts to this resource. The culmination of the two-phase project, of which this is the first, will be a National Register nomination, an accurate place-related description of the battle, and maps delineating its boundaries.

Many people in the county are unaware that there were two significant Civil War battles fought here (Cool Spring and Berryville) and what properties were included in those battlefields. A National Register nomination, both in process and result, will provide an anchor for engaging the public and Clarke County and Berryville Town government. Through a series of public meetings, community members and local government will be brought together to discuss historic research about this battlefield, in preparation for embedding appropriate protections for the battlefield in Clarke County planning documents. These events will also raise awareness about the future of the battlefield and its relationship to land-use decisions by private parties and local government. A public Information meeting was held in late September of 2019. The consensus among citizens was to pursue more information regarding the Battle of Berryville with the ultimate goal of National Register listing.

Because very little is known about the extent of the Battle of Berryville, research and documentation of the site is the necessary first step in building public awareness to support battlefield protection and preservation. While most essential battlefield features remain, growing development pressure means that meaningful preservation of the landscape needs to occur in the next five years. Without the basic research and documentation, exemplified in a National Register listing, further steps towards preservation will be difficult.

#### B. Objectives and Activities

The ultimate objective of this project is to establish a National Register listing for the battlefield of the Battle of Berryville (VA118, Civil War Sites Advisory Commission, Clarke County, VA). The proposal is to do this in 2 phases. First, and the purpose of this grant, is to conduct historical documentation and military terrain analysis of the entire battlefield in order to determine the specific boundaries of the Battle followed by completion of the Preliminary Information Form (PIF) for the National Register Nomination. This phase will involve conducting exhaustive battlefield research using primary and secondary accounts associated with the Battle of Berryville to develop a Civil War Military Context; identification of locations on the terrain associated with the Battle of Berryville and its aftermath; creation of GIS-based graphics needed to support the context and the Preliminary Information Form (PIF); I contacting and involving all landowners that would be impacted; determining the potential boundaries for the proposed district based on field and battle analysis; and completing a Preliminary Information Form (PIF) and submitting it to the Virginia Department of Historic Resources to officially determine eligibility. Throughout this process the public and supporting organizations will be included in obtaining and reporting on results as a key component of building private and governmental support for the long-term protection of the battlefield, which is at risk due to insufficient local knowledge and to continuing encroachment of development. The second grant would involve the architectural survey and determination of the contributing and non-contributing elements of the battlefield and the entry of the resources into VDHR's V-Cris database; and the completion of the final National Register Nomination. Any archaeological components of the project will also be completed during this second phase. Public education will be a key component throughout the process.

For this first phase of the project the primary product will be a map showing revised routes, core and study areas, and defining battlefield features, by completing a thorough critique of available primary and secondary accounts that detail who was where doing what, why, and for how long. This will be done in conjunction with an understanding of the battlefield terrain to help define in less than general terms, terrain areas that need to be included in the battlefield. After the boundaries are established, the PIF will be developed using all of the research findings. The Secretary of the Interior's Standards for Archeology and Historic Preservation will be applied where appropriate.

#### C. Administration and Implementation

The grant and project will be administered by the Clarke County Natural Resource Planner. Addition local government personnel will include administrative assistants, procurement personnel, and the accounting department. Contractors will be hired utilizing County procurement policies to ensure that all procurement is being done in accordance with applicable laws and specifically, the Virginia Public Procurement Act of the Code of Virginia. Specific consultants' positions will include an historian to provide a thorough critique of available primary and secondary accounts that detail who was where doing what, why, and for how long. Another contractor or perhaps the same individual maybe needed that understands battlefield

terrain to help define in less than general terms, terrain areas that need to be included in the battlefield. A task schedule is included in the other attachment forms. Access to private property will

The consultant(s) would meet the Secretary of Interior's Professional Qualification Standards. The project activities include:

- 1. Conduct the historic research required to establish context and better determine specific historic district boundaries.
- 2. Conduct a public information meeting (with DHR) about the proposed district to inform local citizens, answer questions, and get their input.
- 3. Identify potential contributing and non-contributing resources that would help define the boundaries.
- 4. Prepare a draft Preliminary Information Form (PIF) for the Battle of Berryville Historic District and submit to VDHR for review.
- 5. Revise PIF and submit completed PIF to VDHR.
- 6. Present the completed PIF at a public information meeting.

All reasonable steps will be taken to ensure full public understanding of the impact of the Preliminary Information Form. Public information meetings (with DHR) will be held at the beginning of the process and at the completion of the PIF. In addition, several newspaper articles will be written advertising the project.

#### D. Partnerships and Engagement

Partner Organizations include the following:
Shenandoah Valley Battlefields Foundation
State Historic Preservation Office
John Mosby Heritage Area
Clarke County Historical Association
Clarke County Board of Supervisors
Berryville Architectural Review Board
Josephine School Community Museum
Clermont Foundation
Residents within the proposed Battlefield Boundary

All partners will be included in public informational meetings. One such meeting was held on September 30, 2019 (newspaper article included in the other attachment forms). Postcards were mailed to all residents within the proposed boundary of the Battle, approximately 70 residents attended, along with representatives from many of the partner organizations. Additional public information meetings are planned throughout the grant period. Direct mailings, social media, and the County website will be used to inform residents on upcoming events. In addition, partner organizations and the public will be encouraged to provide information regarding the Battle to consultants. Many residents had stories to share regarding artifacts discovered on their properties. These accounts should provide important information as to where the Battle occurred and will help to strengthen the project's preservation objectives.

#### E. Secretary of the Interior Priorities

The project will advocate for balanced stewardship and foster relationships with organizations that encourage stewardship by providing a better understanding of the significance of the Battle and the location. Properties within the designated area will have increased potential for qualifying for Conservation Easements providing permanent protection for portions of the battlefield. A National Register nomination, both in process and result, will provide an anchor for engaging the public, organizations with an interest in history, Clarke County and Berryville Town government. Through a series of public meetings, community members and local government will be brought together to discuss historic research about this battlefield, in preparation for embedding appropriate protections for the battlefield in Clarke County planning documents. These events will also raise awareness about the future of the battlefield and its relationship to land-use decisions by private parties and local government.

#### F. Current or Recent Grant Performance

The Clarke County Conservation Easement Authority was awarded an ABPP grant in 2016, Grant number P16AP00068 for acquisition of a Conservation Easement on the Cool Spring Farm, LLC. The outcome was successful, permanently protecting 106 acres within the Cool Spring Battlefield. The easement is held by the Virginia Department of Historic Resources.

#### G. Statement of Overlap

The Clarke County Historic Preservation Commission affirms that no overlap or duplication exists between the proposed project in this application and any other anticipated project in terms of activities, costs, or time commitment of key personnel, including any application that was submitted for funding consideration to any other potential funding sources (Federal or non-Federal).

Historical Research and Military Terrain Analysis

Battle of Berryville September 3-4, 1864

Clarke County, Virginia

## Who Is RGA

#### **FIRM**

- Founded in 1988 as a full-service cultural resources management firm
  - Offices in New Jersey, Pennsylvania, North Carolina

#### YOUR PROJECT TEAM

Michael Gall, RPA – Project Manager

Seth Hinshaw – Research and Historic Context Development

Sean McHugh, RPA – KOCOA-military terrain analysis

Jason Shellenhamer, RPA – Archaeological Assessment

Robert Wise – Research and Historic Context Development

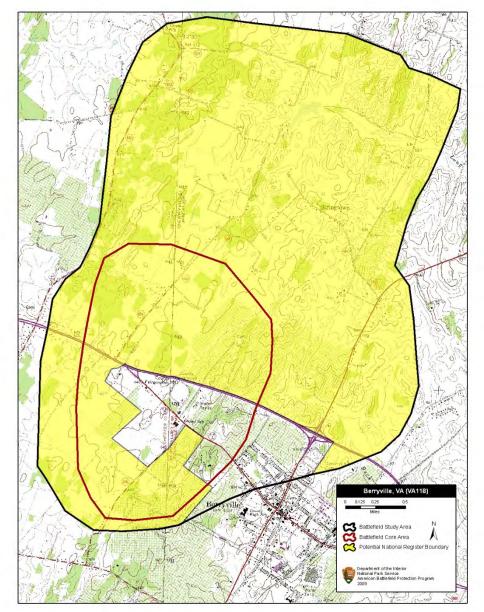

## **Project Tasks**

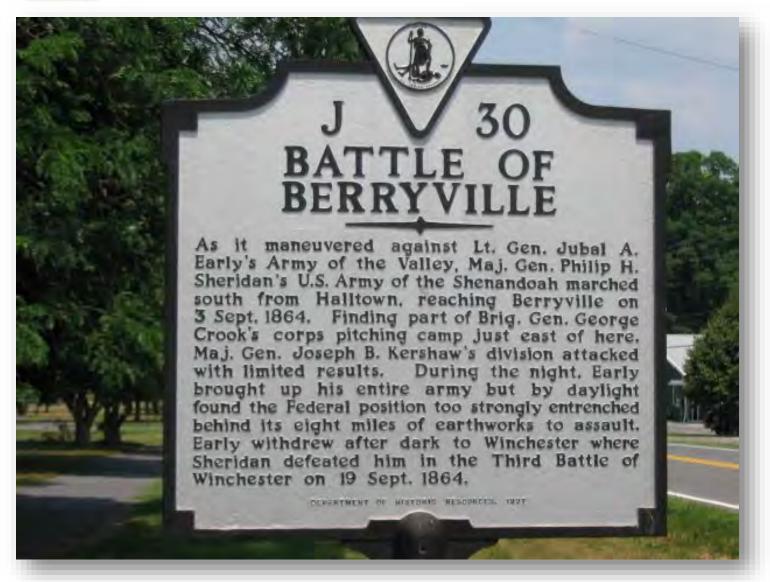

- Identify a Study Area
- Examine Primary Records (Letters, Maps, Drawings, Newspapers)
- Create a Historic Context for the Battle of Berryville based on Research
- Conduct a Site Visit to Record Existing Conditions
- Identify, Document and Map Physical Defining Features for the Battle Using the NPS Battlefield Survey Manual and KOCOA Analysis
- Conduct a Military Terrain Analysis

- Identify the Battlefield Core Area
- Identify Areas of Potential Archaeological Sensitivity for Battlefield Resources
- Identify Battlefield Potential National Register Historic District Boundary
- Consult with the Department of Historic Resources (DHR)
- Prepare Study Report
- Prepare Preliminary Information Report
- Determine if there is enough Integrity and Significant for a Potential Battlefield Historic District

## NPS Suggested Mapping

- NPS Defined the Study Area (Black Line)
- Battlefield Core Area (Red Line)
- Potential National Register Boundary (Yellow Area)

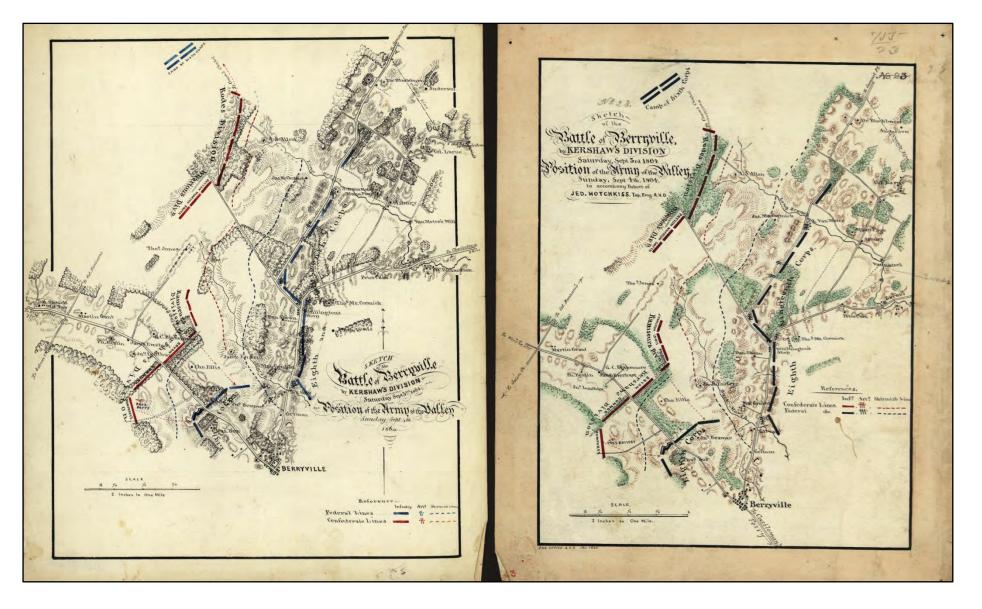

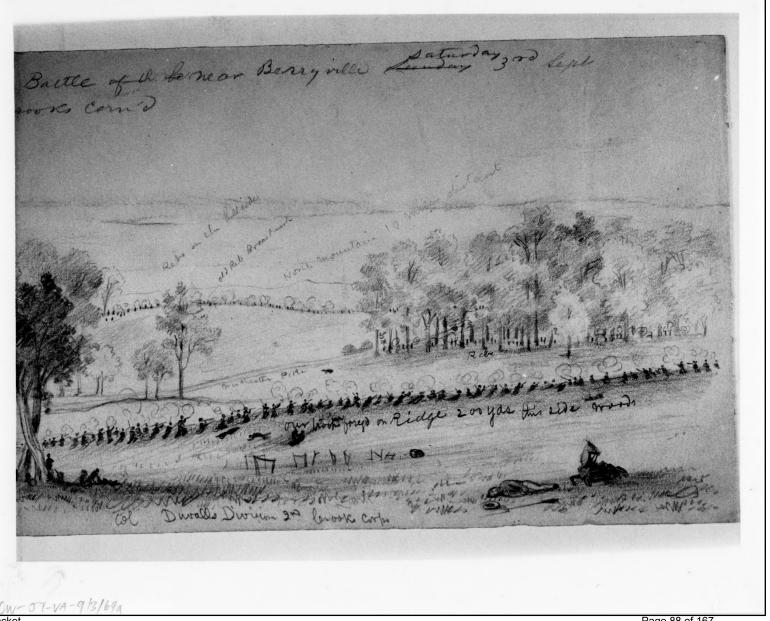

## Historic Context Development

- Themes of the Context
  - Narrative of the Battle of Berryville
  - Relevance to the Shenandoah Campaign and Significance Nationally
- Elements of the Context
  - Summary of Military Commanders
  - Orders
  - Strategies
  - Movements and Actions
- Goal of the Context
  - Provide the basis for the assessment of significance
  - Serve as the foundation for the KOCOA-Military Terrain Analysis

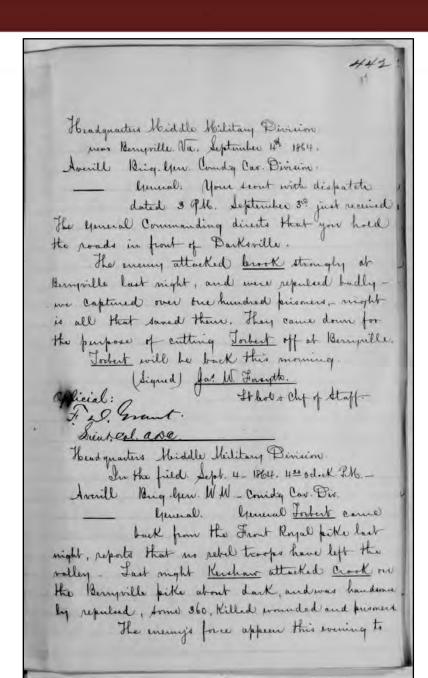

## Historic Mapping

## Historic **Drawings**

# Historic Documents

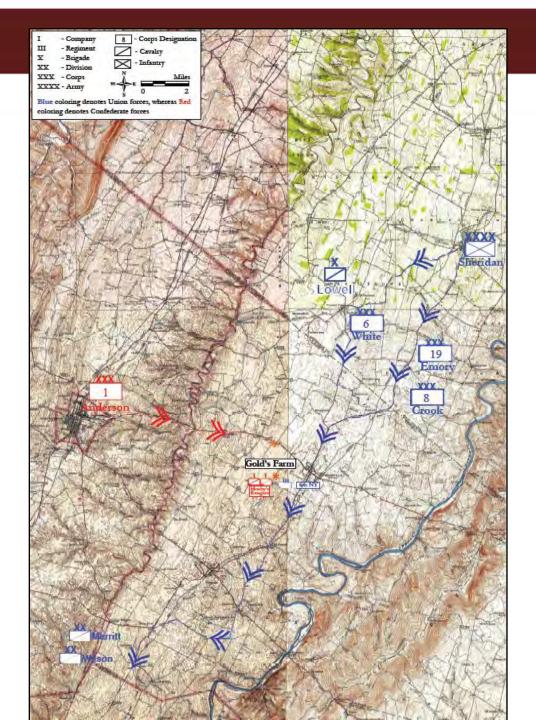

September 3

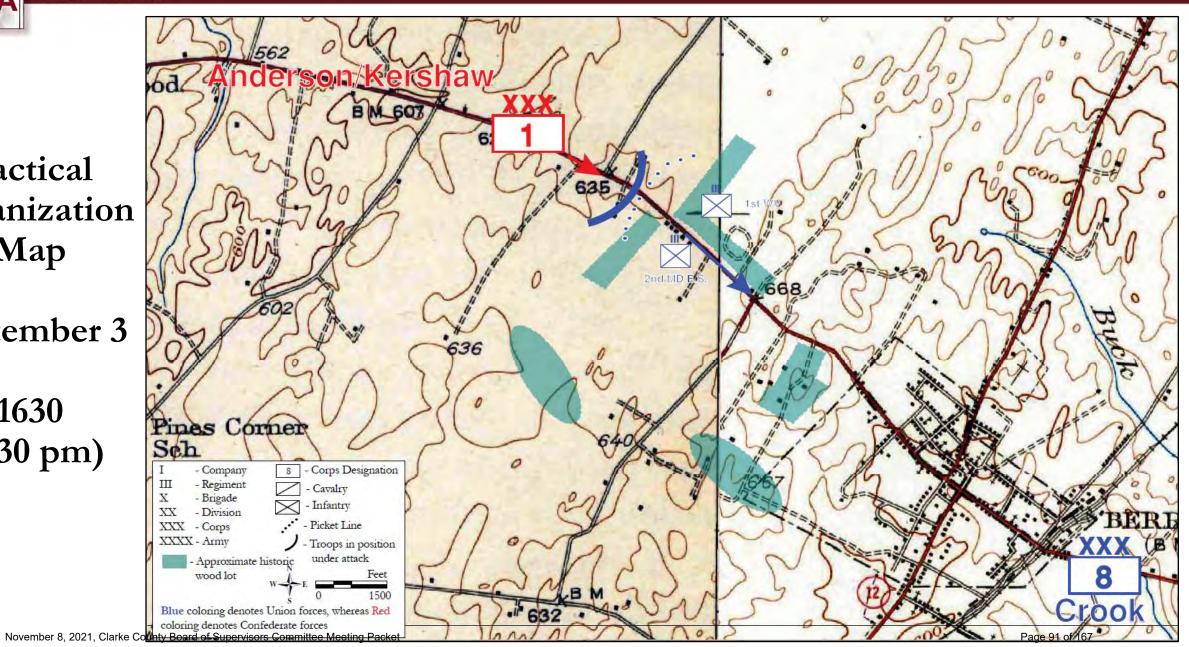

0300 (3:00 am)

Prior to Engagement

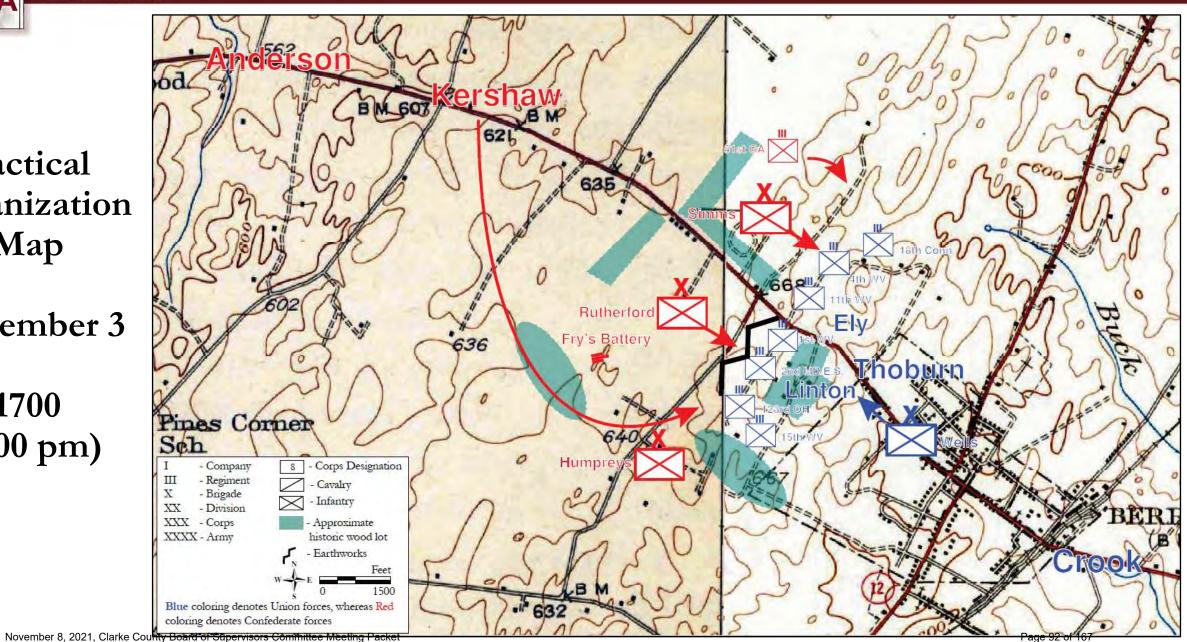

September 3

1630 (4:30 pm)

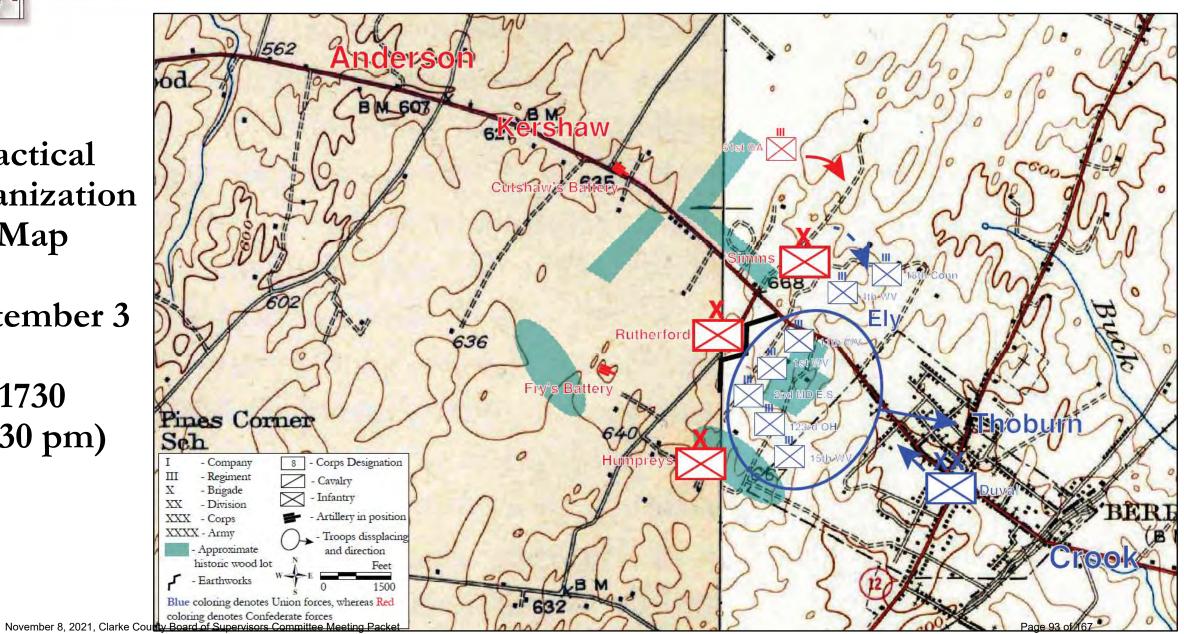

September 3

1730 (5:30 pm)

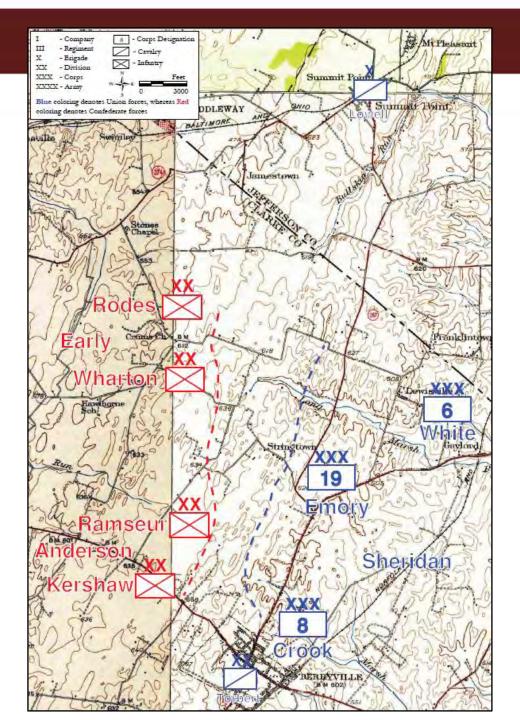

September 3

1800 (6:00 pm)

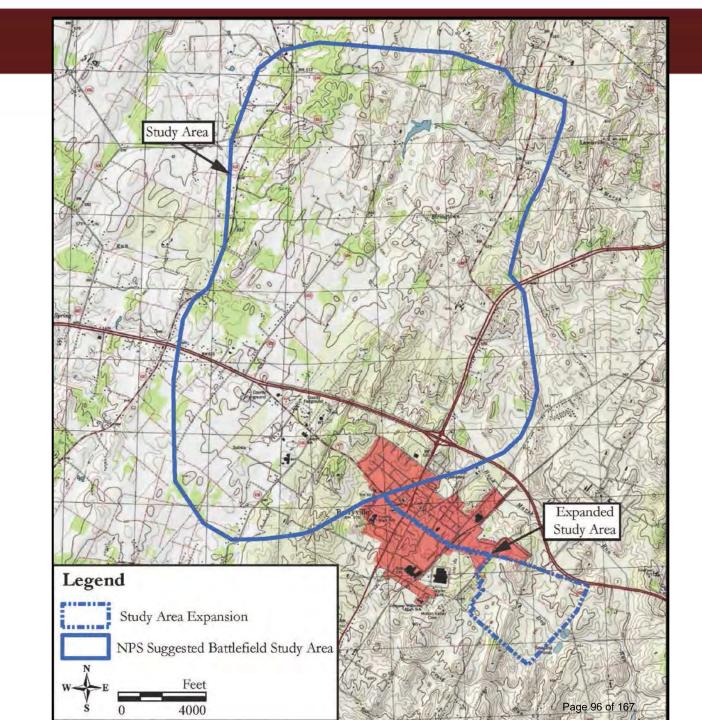

September 4

1000 (10:00 am)

## Study Area Expansion

- Utilized NPS Study Area as a Guide
- Based on the Historic Context
   Development and Archaeological
   Research, the Study Area was Expanded to the Southeast

## KOCOA Analysis

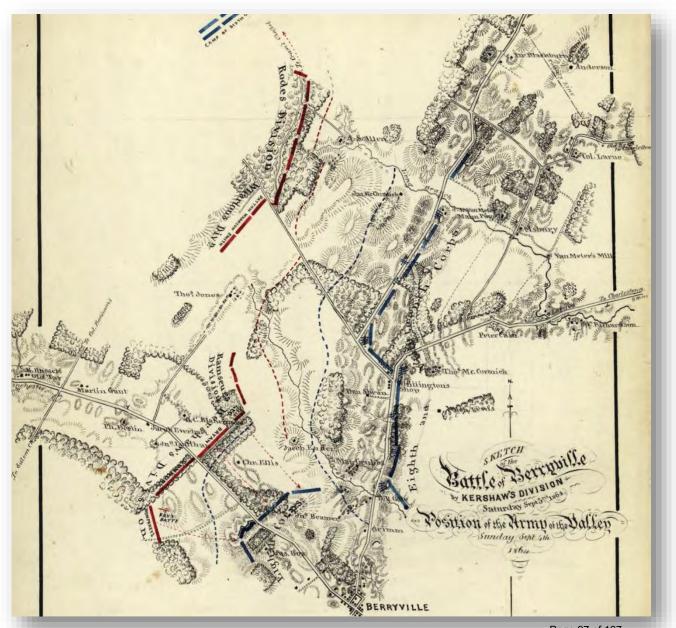

**K**ey Terrain

Observation and Fields of Fire

Cover and Concealment

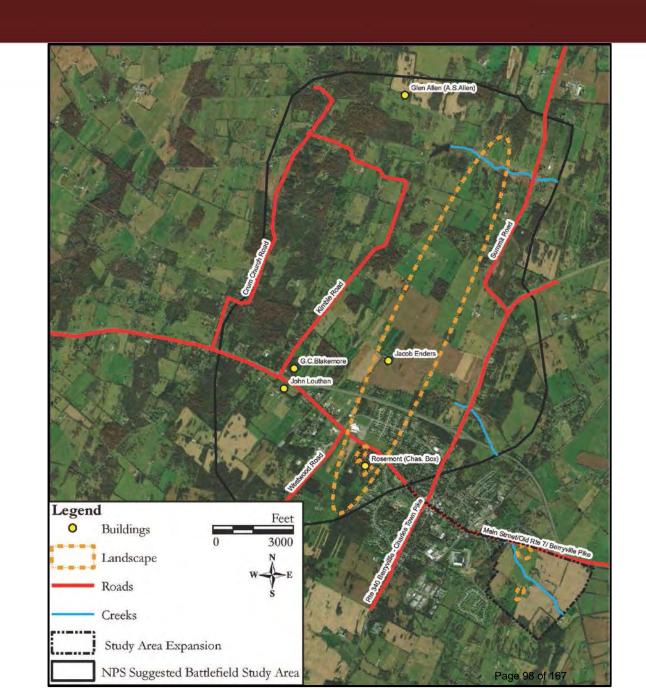

**O**bstacles

**A**venues of Approach and Withdrawal

## **Defining Features**

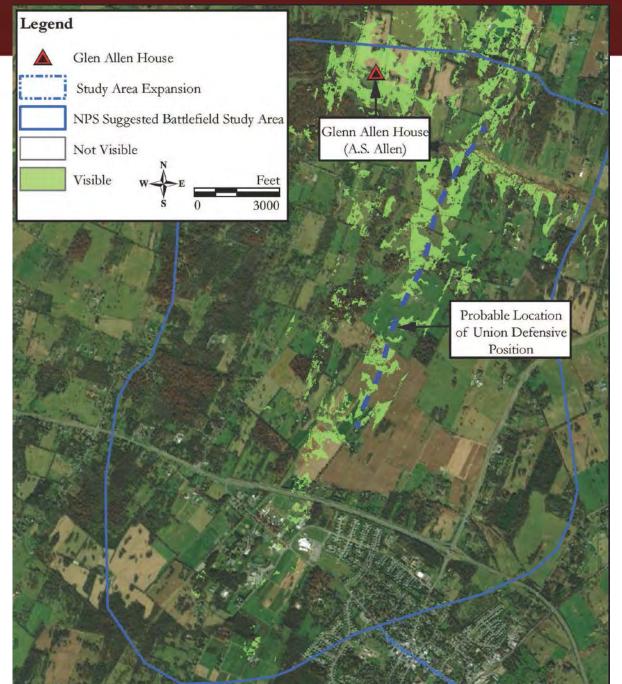

- Documents and Maps used to Identify Defining Features
- Where possible, Defining Features were Visually Inspected during Fieldwork
- Elements not identified in the field are classified as Battlefield Features (Not Mapped)
- Evaluated the terrain for military significance (KOCOA)
- Assess the importance of each (i.e., Key Defining Feature)

## Military Terrain Analysis

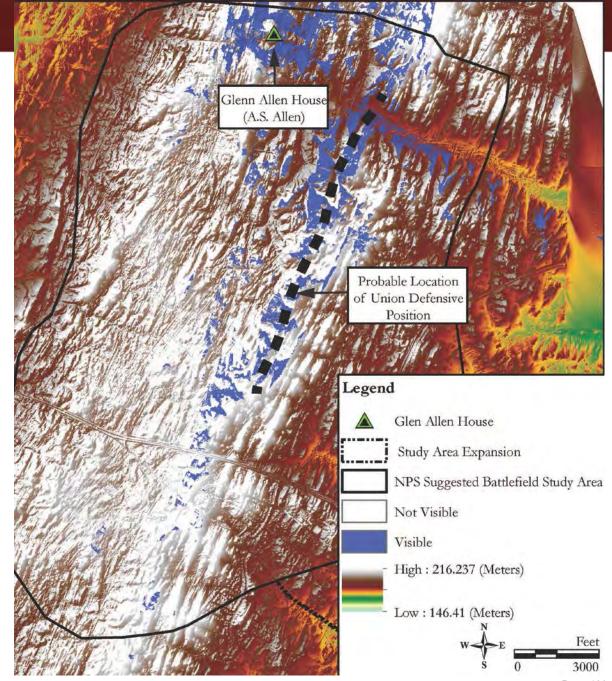

- Analysis of the engagement focused on the utilization of terrain
- Employed viewshed analysis to determining critical observation points
- Identified important uses of terrain throughout the engagement

## Military Terrain Analysis

- Analysis of the engagement focused on the utilization of terrain
- Employed viewshed analysis to determining critical observation points
- Identified important uses of terrain throughout the engagement

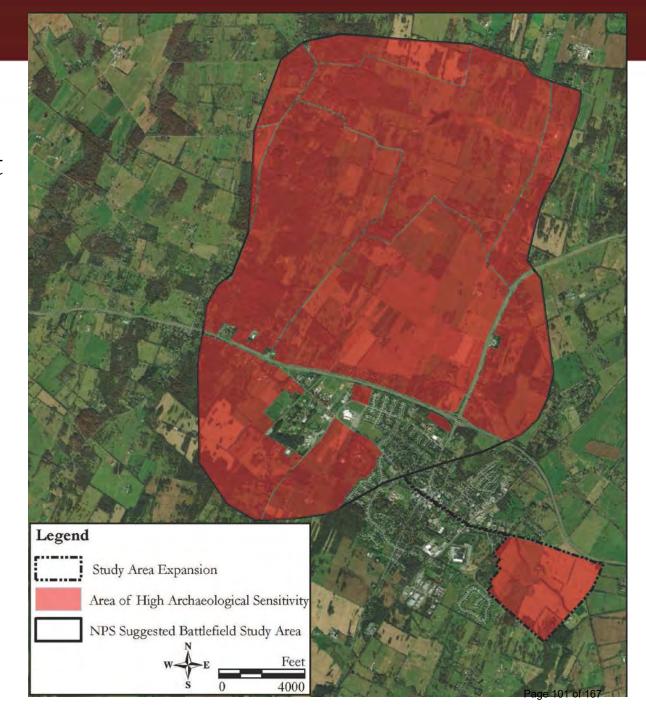

## Archaeological Sensitivity Assessment

#### Criteria:

- Excludes Disturbed Areas
- Uses Current Archaeological Survey Data (VDHR VCRIS data)
- Known Military-related Archaeological Sites
- Areas of Documented Military Activity
- Uses Information Provided by Local Community
- Areas Likely to Contain Military Artifacts

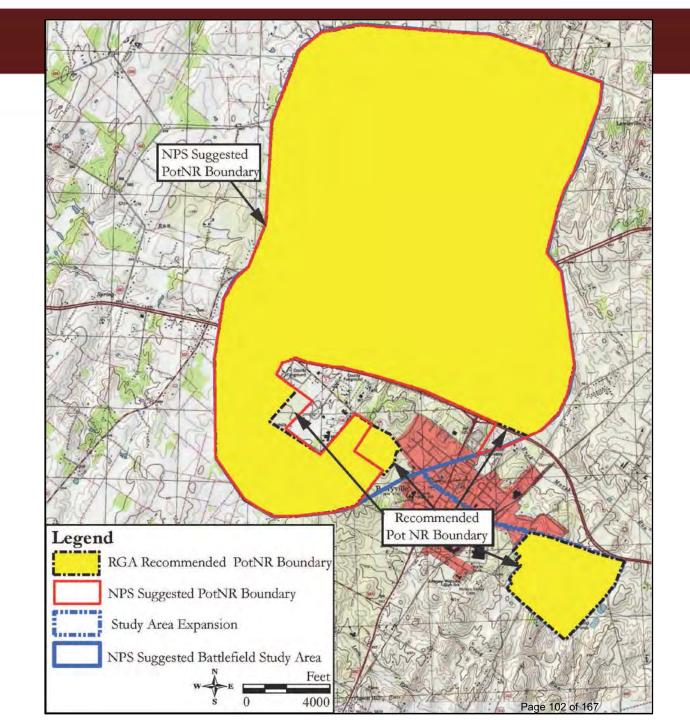

## Battlefield Integrity and Potential National Register Boundary

#### Criteria:

- Excludes Modern Development Areas
- Includes Areas of Potential Archaeological Sensitivity
- Includes Areas of Defining Features
- Includes Areas that Retain Integrity of Place, Feeling, and Association During the Battle

## Next Steps

## **Public Meeting**

Address Public Meeting Comments

## Consult

Consult with DHR

Prepare Preliminary Information Form

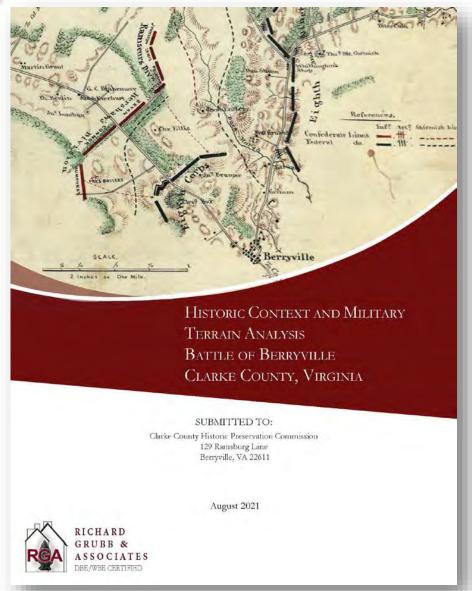

## Report

Prepare Final Report

### RICHARD GRUBB & ASSOCIATES

DBE/WBE/SBE CERTIFIED

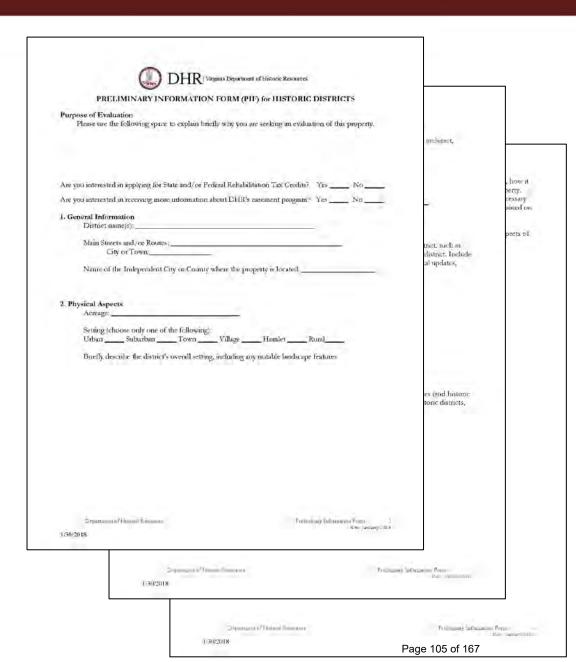

## Study Report

#### **Components of the Technical Report:**

- Introduction
- Survey Methods
- Historic Battlefield Context and Sheridan's Shenandoah Campaign Context
- Key Defining Features
- Fieldwork Results
- Sensitivity Analysis
- Proposed Battlefield Boundary
- Discussion of Significance and Study Recommendations

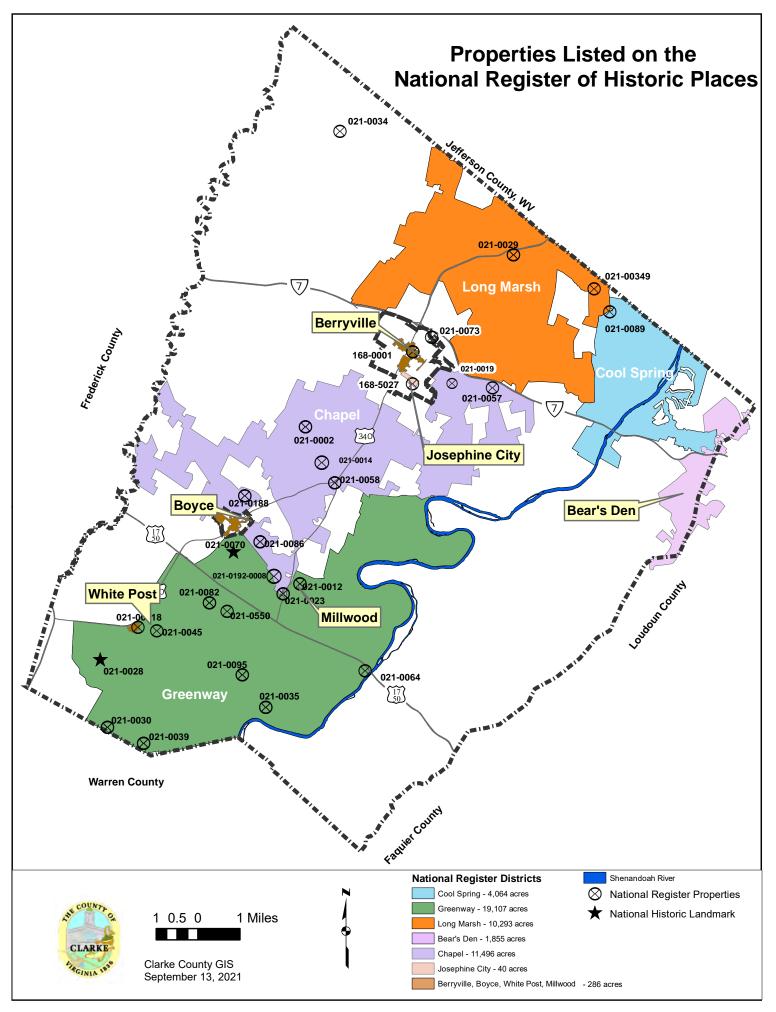

## DHR Historic District Preliminary Information Form (PIF)

- Submit PIF to DHR
- Enables DHR to Determine Next Steps for National Register Eligibility
  - Survey Information used in the NRHP Process
  - NRHP Provides Protections for Listed Historic Properties

## Questions?

## **2021** Legislative Priorities and Positions for Clarke County November 12, 2020

#### **Top Priorities for 2021**

Issue: Land
 Conversion for
 Nutrient Credit
 Program

Clarke prefers that credits be available only from within the HUC unit that credits are needed and not from adjacent HUC units.

Clarke believes that additional research is necessary to determine the unintended consequence of permanent removal of agricultural production on areas identified as important farmland soils by the Natural Resource Conservation Service (NRCS).

The Department of Environmental Quality adopted a post-construction water quality and quantity program requiring everything built after July 1, 2014, be nutrient neutral. Nutrient / phosphorous credits can be purchased and point sources and municipal systems can "true up" on an annual basis and buy term credits. However, to make the "math work" on new development, only permanent credits can be purchased, which cannot be renewed year after year. Rules require that the credits must be purchased within the eight-digit hydrologic unit or an adjacent eight-digit hydrologic unit hub. Clarke is adjacent to five out of seven of the Potomac River hubs; so, developments in those areas can buy nutrient credits in Clarke. The program specifically seeks agricultural property to remove from production and, typically, trees are planted and maintained in perpetuity.

#### 2020 Update:

- Carried Over: HB1464 Local authority to restrict nutrient credit usage. Authorizes the governing body of any locality, by ordinance, to restrict the total nutrient credits that are generated in the locality and used in an adjacent eight-digit hydrologic unit code or fourth order subbasin to comply with stormwater nonpoint nutrient runoff water quality criteria.
   Patron - Gooditis
- Failed: HB1393 Nutrient credit trading; adjacent hydrologic unit code. Removes authority for a Virginia Stormwater Management Program or Virginia Erosion and Stormwater Management Program to allow compliance with stormwater nonpoint nutrient runoff water quality criteria through the applicant's acquisition-of nutrient credits in the same tributary

Top four priorities listed in order of priority.

in an adjacent hydrologic unit code (HUC) or fourth order subbasin unless certain existing criteria for purchasing credits outside of the HUC or fourth order subbasin are met, when the credits are in a locality with a population fewer than 20,000 and geographic area under 200 square miles. *Patron - LaRock* 

2. Issue: Composite Index

Appeal Process: Clarke supports legislation that would establish an appeals process for local governments to challenge computation of the Local Composite Index.

Use Value: Clarke supports legislation to adjust the calculation of the Local Composite Index for public school funding by directing the Department of Education to adjust its funding calculations for the local ability to pay by using the use-value assessment of real property, instead of the true value, in localities that have adopted use value taxation.

Other Programs: In application of the index to fund all other programs, Clarke supports legislation to adjust the calculation of the local Composite Index to base its Real Estate value calculations on use-value instead of true value in localities that have adopted use-value taxation.

3. Issue: Broadband

Clarke urges the Commonwealth and Federal Government to assist communities in their efforts to deploy universal, affordable access to broadband for all areas, particularly in under-served and rural areas.

Clarke opposes mandates that limit or restrict local use authority for the siting of telecommunications infrastructure or result in a negative fiscal impact to county budgets.

Clarke supports economic development policies and programs that bolster local and regional development efforts by maintaining state funding and granting additional funding and authority to promote local and regional initiatives.

See accompanying document: *Clarke County Broadband Accomplishments*.

4. Issue: Education

Clarke supports full funding of Virginia's Standards of Quality as recommended by the Board of Education. The Commonwealth should fund its share of the true cost of K-12 public education without reducing

other parts of the budget affecting local government or shifting costs from the Commonwealth to localities.

In addition to meeting its obligations to fund fully instructional staff, Clarke County believes the Commonwealth should meet its obligation to fund fully the support side of K-12. Full restoration should be made of the cuts made in since 2009 in areas related to support staff funding including the elimination of the funding cap on support positions, reinstatement of the Cost of Competing funds for support staff, etc.

2020 addition, Clarke urges the General Assembly to adopt hold-harmless language for FY 2021 that would protect against drastic decreases in Average Daily Membership (ADM) during the COVID-19 pandemic.

#### Other Issues of Importance

- ▲ Issue: Route VA 7 Pedestrian Bridge
- The number of people attempting to cross VA 7 on foot at the top of the mountain, near the Clarke County and Loudoun County boundary, continues to increase. This location is very dangerous for pedestrians to cross because of the topography, along with the speed and volume of vehicular traffic. A pedestrian footbridge would provide a safe crossing for hikers and others who frequent this area.
- ▲ Issue: Availability /
  Quantity and
  Quality of Water
  Resources
- Availability / Quantity: Clarke supports proactive state action in reviewing and establishing regulations and programs to ensure that localities water sources are protected and that water quantity, as well as quality be protected.

Clarke supports the Commonwealth allowing localities to regulate quantity.

Clarke believes that protecting water availability for residents and local businesses should be a priority by ensuring that future large water users are required to demonstrate through scientific research and water availability studies adequate water supply for the proposed use.

Quality: Clarke supports cost effective measures aimed at reducing loadings of pollutants in state waters from both point and non-

Page 3 of 6

point sources but urges the Commonwealth to consider the impacts of such measures will have on both local governments and agriculture.

Clarke believes reliable forms of financial and technical assistance will be required to help localities and agriculture meet the Commonwealth's goals with regard to water quality and quantity.

▲ Issue: Ethics Rules

Clarke welcomes a review of the Commonwealth's Ethics Rules but believes that the rules that affect local jurisdictions and their Boards, Commissions, Authorities and Committees are strong enough today. Clarke cautions that any increase to the ethics rules affecting localities could prove detrimental to getting people to serve in local government positions.

On the State level, Clarke supports the idea of recording the votes of individual members of the General Assembly at all subcommittee meetings.

▲ Issue: Funding for State Mandated Positions and Jails Clarke urges the Commonwealth to meet its full funding obligations for Constitutional Officers and their state mandated positions.

In addition, Clarke requests that the state budget be amended to fund local and regional jails based on actual costs as determined by the Annual Jail Cost Report, published by the Compensation Board.

 Clarke County supports the Purchase of Development Rights program, the Tax Credit program for the donation of easements, the transferability of tax credits.

▲ Issue: State Tax Reform, Cost and Revenue Shifting, and State Year-end Surplus Funds Clarke calls upon the Commonwealth to restructure state income, sales and use taxes to address anachronistic tax policies.

Tax reform is required to help buttress the Commonwealth's General Fund that finances most core government functions and must be stabilized to meet current and foreseeable core service demands. Failure to address this need has resulted in the unfair gradual shifting of costs and the outright reduction in aid to localities to balance the state budget. With each passing year Clarke County has been required to raise real estate taxes in order to incrementally subsidize a variety of traditionally state funded (or state shared) costs (Compensation Board, Registrar, Cooperative Extension, Line of Duty, Social Services, and the court system for example with Medicaid costs under

#### consideration).

This cost shifting places a tremendous burden on a regressive real estate tax system. Cost shifting must stop and the tax system must be reformed to reduce the burden on the real estate tax. Action must be taken to restore "Aid to Localities".

Clarke opposes permanent tax exemptions; and, if the Commonwealth gives specific tax exemptions for local tax, a sunset clause be included in the agreement.

Tax reform should ensure the protection of the commonwealth's general fund and preservation for core government functions such as public education, health and human services, public safety, natural resources and environmental services. Transportation maintenance and improvements should be paid by user fees.

Page 5 of 6

#### CLARKE COUNTY BROADBAND ACCOMPLISHMENTS

- <u>December 2016</u> -- Board of Supervisors accepted the "Telecommunications Infrastructure and Broadband Study 2020" prepared by the Atlantic Group to be used as a guidance document to improve broadband and telecommunications coverage for residents and businesses.
- <u>February 2017</u> The Board of Supervisors formed the Broadband Implementation Committee consisting of two Board members and two Planning Commissioners. The purpose of the committee is to develop projects and recommendations to help expand broadband internet availability. The committee began meeting in May 2017.
- <u>June 2017</u> -- Zoning regulations for communication towers ("wireless communication facilities") were updated and modernized to help encourage expansion of telecommunications infrastructure.
- <u>June 2017</u> The County issued a Request for Information (RFI) to telecommunications providers and infrastructure developers to gauge the industry's level of interest in expanding broadband and telecommunications as well as ways that the county can assist with this effort.
- <u>September 2017</u> The County launched <u>www.clarkeconnect.org</u> a website dedicated to provide information on broadband initiatives and provider options.
- June 2018 The Broadband Implementation Committee convened a roundtable meeting
  with broadband industry representatives to explore ways that the County could assist the
  private sector to expand broadband availability and potentially remove regulatory
  barriers.
- <u>February 2019</u> New zoning regulations were adopted to allow antenna support structures up to 100-feet tall to facilitate residents' access to wireless broadband services.
- March 2019 The County, in partnership with Comcast, was awarded a Virginia
   Telecommunication Initiative (VATI) grant to extend wired broadband internet to the
   village of White Post.
- May 2019 The Broadband Implementation Committee met with representatives from Rappahannock Electric Cooperative (REC) to discuss their future plans to provide broadband internet service in Clarke as the Central Virginia Electric Cooperative (CVEC) is doing in central Virginia through their spinoff company, Firefly Broadband.
- <u>July 2020</u> The Board of Supervisors added a citizen member to the Broadband Implementation Committee.
- <u>August 2020</u> County Staff developed a map using survey data from Clarke County Public Schools to identify areas of the County that lack broadband access.

Re: 2022-27 Capital Improvement Plan

Date: October 29, 2021

Please place an item on the Finance agenda to discuss the 2022-27 Capital Improvement Plan (CIP). The attached plan has been sent to the Planning Commission for their consideration and may be acted on at their November 5<sup>th</sup> business meeting. The plan includes projects submitted by county department heads and constitutional officers. We also included the Sanitary Authority and School System plans this year.

As noted in the plan description, the CIP is merely a plan and does not obligate the Board to fund any of the projects contained in the plan. Further, it is expected the County will seek grant funding for some of these improvements. If approved by the Planning Commission in November, the CIP would be presented to the full Board for their consideration at the November 23<sup>rd</sup> meeting. Projects included in Year 1 will automatically get submitted as requests in the upcoming 2022-23 budget.

Telephone: [540] 955-5175

# Capital Improvement Plan

# Clarke County

2022-2027

Section 15.2-2239 of the Code of Virginia assigns the responsibility for preparation of the local Capital Improvement Plan (CIP) to the Planning Commission. The CIP is a five year plan which projects capital expenditures for the County. The County has defined capital expenditures for this plan to include expenditures of \$50,000 and up. The Board of Supervisors ultimately approves the CIP. The CIP is intended to assist the Board of Supervisors in preparation of the County budget and Year 1 items will automatically flow into the upcoming budget year's requests.

In addition to determining priorities for capital expenditures, the County must also ensure that projects contained within the CIP conform to the County's Comprehensive Plan. Specifically the projects are reviewed with considerations regarding health, safety, and the general welfare of the public, and the policies of the Comprehensive Plan.

The inclusion of projects to the CIP is in no way an indication that Clarke County will be undertaking these projects. The CIP is strictly advisory, it is a planning document and does not obligate the expenditure of any future funds. In fact, a number of included projects will not likely be funded unless significant outside funding sources are obtained (like grants or private donations). In many cases, including these projects in the CIP does help the County's chances of receiving certain grants or outside funding sources.

The CIP includes both a spreadsheet of future projects broken down by year with estimated costs and a written narrative describing each project.

# 2022-2027 Capital Improvement Plan Project Descriptions

#### **Broadband**

#### **Project 1:** Grant Contribution for VATI

**Description:** Clarke County has submitted a state grant under the Virginia Telecommunications Initiative. If awarded, this project would provide universal broadband to unserved areas of the County. An announcement on the grant is expected in December 2021. The estimated local match for the grant is \$5.4 million, expected to be paid out over the course of the project (estimated to be Year 1 and 2 of the CIP).

**Capital Cost:** \$5,400,000

**Justification:** The lack of broadband infrastructure in Clarke County is the most common complaint received from our citizens. The infusion of \$700 million of federal funds into the VATI program likely makes this an once-in-a-lifetime opportunity to install this infrastructure.

Years Requested: 2022-23 and 2023-24

#### Fire & Rescue

#### **Project 1:** Radio System Upgrade-Repeaters

**Description:** This is Phase 4 of an approved capital project which was developed to improve radio capability for the Sheriff's Office and Fire/Rescue. Phase 2 of this project is currently underway and involves equipment on the Mt. Weather tower. Phase 3 and 4 need to be evaluated once the tower equipment has been installed.

Capital Cost: \$430,000, split over two years

**Justification:** Once the Phase 2 equipment is installed (expected to be completed by fall 2021) an onthe-ground evaluation of radio coverage will be performed to test coverage with the new equipment. This testing will determine if further tower improvements are needed and if repeaters in Fire/Rescue vehicles would improve radio operability. The Sheriff's vehicles have repeaters currently so their vehicles can help us test the difference between having a repeater or not. Depending on the results of this evaluation, it may be necessary to equip Fire/Rescue vehicles with repeaters. We believe, at this time, that sufficient funds have been set aside in the capital budget to cover this project.

Year Requested: 2022-23, 2023-24

#### Project 2: Radio Replacement

**Description:** This project will replace 110 mobile/portable radio units/headsets used by Fire & Rescue volunteers and career staff to communicate with dispatch and each other during incidents. Blue Ridge Fire Company is currently the only company with upgraded radios.

Capital Cost: \$600,000

**Justification:** The radios currently in use are over 15 years old and have been discontinued by Motorola. Repair and replacement of these radios has become increasingly difficult and very costly. Radio functionality issues have been increasing over the years and it is currently estimated that 60% of radio traffic is repeated because of these issues. New radios/headsets will improve radio functionality, improve compliance with safety hearing standards, increase interoperability with regional partners, and reduce repair costs. We were unsuccessful in obtaining AFG funding for this project this past year but will continue to seek grants for this equipment.

Year Requested: Spread out over five years

**Project 3:** Self-contained Breathing Apparatus (SCBA)

**Description:** SCBA's provide breathable air to volunteer and career staff on calls where fresh air is not available in the call environment (usually fires). There are currently 115 cylinders and 60 assemblies in the system.

Capital Cost: \$400,000-spread over two fiscal years

**Justification:** This equipment has an expiration date set by National Fire Protection Association standards. The majority of our current equipment will expire according to this standard in 2021 and 2022. This is critical life safety equipment for our volunteers and career staff. We were unsuccessful in obtaining AFG funding for this project this past year but will continue to seek grants for this equipment.

Year Requested: 2022-23 and 2023-24

**Project 4: Cardiac Monitors** 

**Description:** These devices are a critical component of care for volunteer and career EMT's and are used in every day responses. The devices can perform functions as simple as reading blood pressure to as complex functions as defibulation. There are currently seven of these devices in the System and this project would replace three devices.

**Capital Cost:** \$150,000

**Justification:** The industry standard for these units is typically between 10-15 years and some of our units are approaching this age. The manufacturer may also choose to suspend support on these older units at any time (they do provide sufficient notice). We are applying for a Rescue Squad Assistance Fund (RSAF) grant for this equipment but if unsuccessful would need County funds for this replacement project. The RSAF is typically a 50/50 split for the County and an 80/20 split if the fire company applies.

**Year Requested:** 2023-24, 2024-25, and 2025-26

**Project 5:** Apparatus Replacement

**Description:** This is a placeholder to create a fund to assist the fire companies in replacing aging apparatus. A system will need to be developed by the companies and county to assess needs, develop funding formulas, and to forecast the timing of major purchases.

Capital Cost: \$50,000 annually

**Justification:** It is prudent to plan ahead for major apparatus replacement.

Year Requested: Each Year

#### **Health & Human Services**

**Project 1:** New Building and/or Space

**Description:** This new building and or space would house the Department of Social Services, Health Department, and potentially Northwestern Community Services. A more detailed space study and preliminary architectural design is needed but we are budgeting at this point for a 10,000 square foot building at \$150 per square foot.

Capital Cost: \$1,500,000

**Justification:** The Department of Social Services is currently located in a former restaurant building and has configuration challenges. There are also limitations to the current Health Department office space. Northwestern Community Services currently doesn't have any office space in Clarke County. There are benefits to having the services provided by each entity located close to one another. The County owns the Social Services Department so if that building was sold, the proceeds could be used to help recoup the costs of the new building and the county has started setting aside money in the designated fund balance for this project.

Year Requested: 2025-26

#### **Judicial**

#### Project 1: Reconfigure Circuit Court Courtroom

**Description:** This project would reconfigure the layout of the existing Circuit Court Courtroom and address ADA issues. The jury sitting area would be squared up with the room and made level for ADA compliance. This project needs to be studied further by an architect to better determine costs and solutions to existing challenges.

**Capital Cost:** \$100,000

**Justification:** The existing Circuit Court Courtroom layout creates challenges for court proceedings. There are ADA issues because of the sunken floor in the middle of the courtroom. In addition, the current space places jurors very close to the audience with some jurors actually having their back to the audience.

Year Requested: 2024-25

#### Parks & Recreation

#### **Project 1:** Replace rooftop units recreation center

**Description:** The rooftop heating and cooling units at the recreation center need to be replaced. The unit over the gym is original to the building which opened in 1991.

Capital Cost: \$50,000

**Justification:** These units are beyond the expected lifespan for equipment of this nature. There are frequent issues with the operation of these systems.

request issues with the operation of these systems

Year Requested: 2022-23

Project 2: Soccer field grading/parking lot addition

**Description:** This project would allow for the expansion of additional soccer fields and parking by

grading and properly surfacing areas for fields and parking.

Capital Cost: \$75,000

**Justification:** Soccer continues to grow and this growth is stretching the availability of fields and parking. This project would accommodate the growth and expansion of the soccer program. This project would be completed in partnership with the Soccer League with possibly a financial contribution from that group.

Year Requested: 2022-23

**Project 3:** Tennis Court Resurfacing

**Description:** This project would resurface the tennis courts located at the county park.

Capital Cost: \$50,000

**Justification:** The surfacing of the tennis courts is beginning to wear down. In some locations, the existing surface has completely worn away, exposing the subsurface. In addition to frequent community use, these courts are used for high school athletic programs.

Year Requested: 2022-23

**Project 4:** Zero depth pool entry

**Description:** This project would replace the existing kiddie pool, which is not connected to the larger pool, with a very gradual pool entrance. A zero depth pool entry eliminates the need for steps into a pool and also becomes a place for small children to play.

**Capital Cost:** \$150,000

**Justification:** A zero depth entry would address possible ADA issues with the pool, eliminate the kiddle pool which has had some maintenance issues in the past, and would serve both our youngest and oldest populations of pool patrons. Grant opportunities may exist for this project given the improved accessibility.

Year Requested: 2023-24

#### Project 5: New baseball field

**Description:** A new baseball field is proposed in the park where an old soccer field once existed. This field would include fencing, dugouts, and bleachers.

**Capital Cost:** \$125,000

**Justification:** Access to baseball fields are currently at a premium on the weekends during the busiest times of the season. If the baseball program continues to grow, an additional field will be needed to accommodate this growth. We will explore grant opportunities for this project and possible matching contributions from Little League.

Year Requested: 2024-25

**Project 6:** Soccer shelter/restrooms

**Description:** The Soccer League has requested a shelter and restrooms near the soccer fields. This project would include the extension of water and sewer to this area of the park or could possibly involve the installation of a drainfield and the use of the existing agricultural well.

**Capital Cost:** \$100,000

**Justification:** The soccer fields are heavily used but there is not currently infrastructure on that side of the park to accommodate players, coaches, and parents who participate in soccer events. We will explore grant opportunities and possible matching contributions from the Soccer League for this project.

Year Requested: 2025-26

#### **Sanitary Authority**

**Project 1:** Roof Repairs

**Description:** This work involves roof repairs to the existing roof over the old portion of the wastewater treatment plant in Boyce.

Capital Cost: \$60,000

Justification: This work has been recommended by consultants for safety and upkeep reasons.

Year Requested: 2022-23

**Project 2:** Recoat Wastewater Treatment Plant Tanks

**Description:** This project involves recoating tanks at the Boyce wastewater treatment plant.

Capital Cost: \$75,000

**Justification:** This is regular maintenance of these tanks to extend the effective life expectancy of these assets. Recoating of these tanks protects the tanks from wear and tear over time.

#### School System

#### **Project 1:** Boyce Boiler Replacement

**Description:** This project involves replacing the existing boiler at Boyce Elementary.

**Capital Cost:** \$200,000

Justification: The existing boiler has had a number of issues over the years, is very old, and would be

replaced by a much more energy-efficient unit.

Year Requested: 2022-23

**Project 2: JWMS HVAC Building Automation** 

**Description:** This project is phase 2 of a project which would involve the installation of sensors in classrooms and other areas throughout the building. Phase 1 involved installation of the backbone of

this system.

**Capital Cost:** \$100,000

Justification: This project will allow maintenance staff to better control temperatures throughout the

building using an automated system.

Year Requested: 2022-23

Project 3: School Buses (2)

**Description:** The schools have a schedule to replace two school buses each year.

Capital Cost: \$170,000 with inflationary increase each year

Justification: The school bus replacement schedule has been developed to replace older, high mileage

buses.

Year Requested: Each year

**Project 4:** Boyce HVAC Building Automation

**Description:** This project would replace the aging building automation system at Boyce Elementary,

which controls heating and cooling throughout the building.

**Capital Cost:** \$200,000

**Justification:** The existing system has had issues and could go down for good at any time. Support for

this old system ended around 2000. The new system would provide more reliability and allow

maintenance to better control temperatures throughout the school.

Year Requested: 2023-24

**Project 5:** Boyce Roof Replacement

**Description:** The existing roof at Boyce Elementary would be replaced.

**Capital Cost:** \$300,000

Justification: The existing roof is beyond the warranty period and shingles have become brittle

indicating the need for replacement.

Year Requested: 2024-25

**Project 6:** Cooley Lower Roof Replacement

**Description:** This project involves the replacement of the roof at Cooley Lower.

**Capital Cost:** \$250,000

**Justification:** By this timeframe, this roof will be beyond the warranty period and expected life. The

integrity of the roof protects all assets located within the building.

Year Requested: 2025-26

**Project 7:** Cooley Upper Roof Replacement

**Description:** This project involves the replacement of roof at Cooley Upper.

**Capital Cost:** \$175,000

Justification: By this timeframe, this roof will be beyond the warranty period and expected life. The

integrity of the roof protects all assets located within the building.

Year Requested: 2026-27

**Sheriff's Office** 

**Project 1:** Replacement Vehicles

**Description:** This is a standard rotation schedule of three new police cruisers each year.

Capital Cost: \$173,000 with inflationary increase each year

Justification: This replacement schedule ensures older cruisers are retired when mileage and vehicle

maintenance thresholds are reached.

Year Requested: Each year

Project 2: Replacement Radios

**Description:** This project would over time replace the 2007 radios currently in use by Sheriff deputies.

Capital Cost: \$50,000 each year

**Justification:** The existing radios are no longer being serviced by the manufacturer and performance issues of this critical equipment continue to become more prevalent. There will possibly be funds

leftover from the radio system upgrade project to help fund some of these radios.

Year Requested: Each year

Project 3: Emergency Communications Center Phone System Replacement/Upgrade

**Description:** This project is the switchover from copper lines in the emergency communications (911)

center to IP based NextGen 911.

**Capital Cost:** \$150,000

**Justification:** This is a Commonwealth initiative and will be covered by state funds. The second phase in 2026-27 is based on the expected normal phone replacement schedule. This phase will not occur if the equipment is still current and functioning properly but for planning purposes this is the expected timeframe for replacement.

Year Requested: 2022-23 and 2026-27

**Project 4:** Communications Tower Replacement

**Description:** This project involves the replacement of the existing tower located at the Sheriff's Office.

**Capital Cost:** \$150,000

Justification: This replacement has been recommended by consultants based on the age and condition

of the existing tower.

Year Requested: 2023-24

**Project 5:** Building Generator Replacement

**Description:** This project would replace the generator serving the emergency communications (911)

center.

Capital Cost: \$50,000

**Justification:** This critical component to our emergency communications (911) center infrastructure keeps our communications operating during power outages. The contractor servicing this piece of equipment has noted that we need to begin planning for the replacement of this generator.

Year Requested: 2023-24

**Project 6:** Emergency Communications Center Recorder Equipment

**Description:** This equipment records all 911 calls, administrative lines, and radio traffic.

Capital Cost: \$50,000

Justification: The projected cost in 2025-26 is based on a normal replacement schedule, this equipment

will not be replaced if it is still functioning properly and can be serviced.

Year Requested: 2025-26

**Transportation** 

**Project 1:** Pedestrian Bridge Over Route 7

**Description:** This project would involve the construction of a pedestrian bridge over Route 7 at the top

of the mountain near the Loudoun County boundary.

Capital Cost: To be determined

**Justification:** Pedestrian traffic crossing Route 7 at the top of the mountain continues to increase. This has created a serious safety issue as vehicles traveling in both directions are moving at a high rate of

speed and the topography and curves limit visibility. Poor weather conditions only worsen the situation. This project would require state and federal funds to construct. The County has applied for state planning funds to study this project.

Year Requested: 2025-26

#### FY22 YTD Cigarette Tax Revenue

DESCRIPTION	YEAR	PER	EFF DATE	REFERENCE	AMOUNT

Re: Commissioner/Treasurer Window

Date: October 29, 2021

Please place an item on the Finance agenda for a request from the Commissioner of Revenue and Treasurer for a replacement window at their front counters. The existing window has limitations and is unable to be modified. The attached quote is for installation of new windows that would better meet their needs.

Telephone: [540] 955-5175
